The Merchants' Protective Association

OF ELYRIA.

COMMERCIAL LIST.

In presenting this list to the members of the Association, I must inform them that I do not consider it complete, owing to certain pettifoggers interfering with my business and influencing some of the members to withhold the names of their delinquents. But, as I have received the names of a large majority of the members, I herewith publish them, and would say that the next list, which will be published in ninety days, will contain the Commercial Lists of Elyria, Lorain, North Amherst and Oberlin. This will be very beneficial to the members of the Association. I hope that all will respond promptly to the next call.

Yours respectfully,

C. P. HAYS.

N. B.—I shall make Elyria my headquarters for the coming year and can be found at the Metropolitan Hotel when at home. During my absence members can obtain their supplies of F. W. Miller, at *Poultry Nation* Office, Mussey's Block, Elyria.

THIS must not be considered as a Dead-Beat List, but a List of the parties against whom we have claims for collection, viz:

Alger, J. M.
Blanchly, Conrad
Bliss, H. A. (LaGrange)

SEASON, 1891.

PERSONAL !

We acknowledge with thanks receipt to-day of your esteemed order, containing remittance as stated; same shall have our careful attention, and we trust will be filled to your entire satisfaction.

Herewith we send you a copy of our Special List OF NOVELTIES FOR 1891, to which we would invite your attention; by looking over its pages, you may possibly find some varieties of our Specialties you could use to advantage in your Garden, and which receiving less prominence in our Farm Annual, escaped your notice.

Should you have no use for this Catalogue, we would esteem it a personal favor if you will kindly hand it to some friend who has occasion to use Vegetable seeds.

Very truly yours,

W. Atlee Burpee & Co.

A PRIZE ADVERTISEMENT.

In competition for the cash prizes offered in Printer's Ink, of December 24th, 1890, out of more than 300 advertisements received, the following was awarded the first prize of $50.00.

Only Good Seeds Bring Forth Good Crops.

BURPEE'S SEEDS

ARE THE BEST AND CHEAPEST.

SEEDS for the Garden, Farm and Field.

SEEDS that will Yield Abundant Crops.

SEEDS to Sow that will Surely Grow.

SEEDS for the Flower Plot or Window Box.

SEEDS for the North, South, East and West.

Burpee's Seeds are the Best.

To Paint the Lily

Would be the mere mention by us of the excellent quality of our Farm, Garden and Flower Seeds to those who have used them. They know they are the best, and to speak of their real merits is like

Gilding Gold.

To those who have never used our Seeds we say: "Try them." A trial will be a much better advertisement for us than we can pen.

Once a customer, a customer always.

The Popularity of our Seeds increase year by year, and we deal direct with more Planters thar any othe. Seed House in the World. In the busy season we receive daily from 3,000 to 5,000 letters and postal cards.

Six Choice Novelties. ***Burpee's Red Etna Pepper,—New Golden Self-Blanching Celery,—Vandergaw Cabbage,—Burpee's Hard-Head Lettuce,—The Delaware Watermelon,—and The Matchless Tomato.***—One full-size packet of each, with plain directions for culture, will be mailed to any address on receipt of **25c.**, or any three of these **Choicest New Vegetables** for **16c.** (8 two-cent stamps). Our Farm Annual for 1891 will be mailed free to all favoring us with an order. All our Seeds are warranted. Write us to-day.

BURPEE'S FARM ANNUAL for 1891.

With **Colored Plates Painted from Nature.** 168 pages. Free. Full of hints to those who know, and valuable information for those who want to know about Farm, Garden and Flower Seeds, Plants, Shrubs, Lilies, Gladioli and other Summer-Flowering Bulbs. **Rare Novelties** are described, many of which can only be had direct from us. It tells how to get valuable premiums, including Mrs. Rorer's New Book, just out—Free. Write to us at once and secure free this valuable Farm Annual. Write to-day.

Name this paper and address

W. ATLEE BURPEE & CO., Philadelphia, Pa.

COPYRIGHTED, 1891, BY W. ATLEE BURPEE & CO., PHILADELPHIA.

The Six Choice Novelties advertised above, if properly grown, will prove the superior quality of BURPEE'S SEEDS.

BURPEE'S DEFIANCE LARGEST-FLOWERING PETUNIAS.

This seed is all carefully saved from the finest plants in our large collection of all the grand varieties named on page 105 of THE FARM ANNUAL FOR 1891 (*except white*, which is not sufficiently large), and also from other magnificent, large, fringed varieties, which we do not offer separately. We have frequently measured flowers *over five inches in diameter*, while the colors are indescribably rich and varied. All visitors to our *Fordhook Farm*, including seedsmen and florists, were most enthusiastic in praise of this unrivaled strain.

Per pkt. 25 cts.; 3 pkts. for 60 cts., or 6 pkts. for $1.00.

AS EXPLAINED on the other side we are determined to extend the culture of **FLOWERS from SEED,**—therefore if the **Coupon** printed below is returned this spring, accompanying a cash order of $1.00 or more, for **Seeds, Bulbs** or **Plants** of any kind, **it will be accepted the same as 25 CENTS CASH** in payment for the purchaser's choice of any separate packets of **FLOWER SEEDS only.** Please preserve this Coupon and see that it is mailed in the same envelope with your spring order for seeds.

OUR FLOWER-LOVING CUSTOMERS who would in any case order Flower Seeds are likewise entitled to this Coupon. As by our regular catalogue terms the purchaser is entitled to select 25 cents' worth extra for each one dollar's worth of packets ordered, with this **Coupon-Gift of 25 Cents,** the purchaser remitting one dollar before June secures Flower Seeds to the value of $1.50. In such cases the Coupon apparently fails in its prime object of introducing our Flower seeds into new homes, but we can safely rely upon those who are already lovers of Beautiful Flowers to heartily co-operate with us in extending their culture, by acquainting their neighbors with our liberal offers and by recommending **BURPEE'S SEEDS.**

This Coupon, accompanying any Cash Order for One Dollar or more, entitles the sender to receive **FREE** one regular 25 cent packet of **Burpee's Defiance Largest-Flowering Petunias, OR** to select any other separate packets of **Flower Seeds** to the value of **25 Cents,** — if it is returned before May 31st, 1891.

W. Atlee Burpee

TO PROVE the SUPERIOR QUALITY of

BURPEE'S SEEDS

WE WILL MAIL ALL THESE

5 Finest Flowers FOR 26 cts. together with our complete FARM ANNUAL for 1891.

CROZY'S CANNAS — **New Large Flowering, Ever-blooming Dwarf French Cannas,** with immense clusters of magnificent flowers, as *richly colored as Orchids*, and *more profuse flowering than Gladioli.* See *colored plate* in *Catalogue* and *illustration* herewith. Neat, dwarf growth, with handsome foliage. They bear their beautiful, large flowers, of many colors, all summer, the *first year from seed.*

GOLDEN GATE POPPIES. *A grand novelty.* Entirely unique in wondrous variety and brilliancy of bloom; myriads of most gorgeous flowers of every conceivable shade.

FRINGED STAR PHLOX. *An odd novelty* of surpassing beauty; 40 varieties of elegantly edged and fringed flowers of *star-like form.*

NEW FANCY GERMAN PANSIES. Special selection of only *the brightest and best,* superbly spotted and stained, striped and margined, *Imperial Prize Pansies,* of striking beauty. Flowers of perfect form and large size.

ECKFORD'S NEWEST SWEET PEAS. Embracing the *latest novelties,* largest and most beautiful named varieties in *superb mixture.* **Never before equaled.** Pkt. 10 cts.; oz., 20 cts.

For 26 cts. (13 two-cent stamps) we will send all the above—

FIVE FINEST NOVELTIES

with full directions for culture printed on each packet. ☞ *If you do not want all of these seeds,* you can select any **Three Varieties for 16 cts.**

If you want any other Seeds, ask for

BURPEE'S FARM ANNUAL FOR 1891,

With **colored plates painted from nature,** tells all about the ☞ **BEST SEEDS** ☜ including **RARE NOVELTIES,** which cannot be had elsewhere. ☞ It also tells how to get *Valuable Premiums,* including **MRS. RORER'S NEW BOOK,** *just out,* **FREE!** ☞ *Name this paper,* and write to-day.

W. ATLEE BURPEE & CO., Philadelphia, Pa.

—FLOWER SEEDS Presented FREE!—

For many years we have been engaged in growing and distributing Seeds, and hope to continue actively in the same line for many years to come. Our trade in supplying choice vegetable seeds through the mails has reached proportions never attained by any other house, but we annually notice that many of our best customers neglect to purchase any flower seeds. In fact, the growing of Choice Flowers from Seed is yet in its infancy in America.

☞ In order to extend their culture and at the same time **prove the superior quality of BURPEE'S FLOWER SEEDS,** we have decided, for this spring, to present, **entirely FREE** to all our customers whose orders amount to one dollar or more, twenty-five cents' worth of Flower Seeds, of any separate varieties the purchaser may select from our catalogue; —see Coupon on other side. ☞ This offer does **not allow** the selection of *a Collection* as a Premium. If the coupon is returned without specifying any separate packets of Flower Seeds from our FARM ANNUAL FOR 1891, we will send a 25 cent packet of the unequaled **Burpee's Defiance Petunias** illustrated on other side of this circular, and which will prove a *complete revelation* to those familiar only with the old Petunias.

Cism Mare shod

The fine shower of forenoon extended only 3 miles West North or South.

Thursday, August 20th 1891.

Lake

Mrs Metcalf & Baby Arlen with Carriage & buggy stopped at Lu Days on account of the Shower. Nettie leaving Buggy for Wagon. The Wagon with Polly contained Father D.V. Ethel, and 5 small boys with after Days Nettie also.

Shower striking us in North part of Sheffield Stopped at Root 2 or 3 hours.

Nice Nice and Warm.

Home before 5 P.M.

But the P.M. Shower here was only rinsed & Sprinkled.

Prayer Meeting.

The Darling Blessed Mother went home to her God at 12 M.

Ralph very sick

Her last words when unable to gasp but a word at a time. "I know that my Redeemer lives"

Monday, when she realized the danger she told me.
"I do not know but I shall go home first."
"I had wanted to live to take care of you."

Saturday. Dec. 8th, 1894.

Remembered

It was her wish that no address should be made at her funeral—only that the Scriptures should be read, a prayer offered, and some beautiful hymns sung. Rev. E. E. Williams, her pastor, conducted the services. Three hymns were sung by a quartet consisting of Mrs. F. M. Townsend, Miss Clara Smith, Mr. Charles Pomroy and Mr. Charles Lord. The house, especially the room in which the two caskets lay, contained exquisite cut flowers in profusion, the offerings of loving friends.

Six sons were born to Mrs. Metcalf, the eldest, Ralph, having nearly reached his sixteenth birthday. He seemed to have inherited his mother's delicate constitution, and was taken Thanksgiving night with a chill. Pneumonia ensued, and he grew worse continually until his death, which occurred Monday afternoon at one o'clock.

He was a member of the Senior class in the High School, of the Boys' Historical Missionary Society, and of Miss Mary Williams' Sabbath School class, all of whom attended the funeral services in a body, carrying many flowers to brighten his last resting place.

Ralph, with his two next younger brothers, united with the Congregational church last August, and his beautiful Christian character grew continually. His death was calm and happy, with his undying love for the Saviour.

The burial took place Tuesday afternoon, being attended by only the relatives, the mother and son being placed in one grave.

Miss Ethel Metcalf arrived from Chicago Saturday morning, and will remain with her father until the latter part of the week. Mr. Harlan Metcalf arrived from Des Moines Monday night. Miss Marion Metcalf will not arrive from Hampton, Virginia, for some days, and then will come prepared to remain at home.

A Double Bereavement.

The memorial services of Mrs. Harriet Howes Metcalf, and of Ralph Howes Metcalf, her eldest son, occurred at the family residence, 43 West avenue, Tuesday morning at ten o'clock.

Seldom has this community been called to mourn over such a sad, two-fold calamity, or one whose effects are more widely felt; and the house was crowded with the large gathering of sorrowing friends.

Mrs. Metcalf died Friday noon of a complication of pneumonia and heart trouble, at the age of forty-four. Her brief illness lasted little more than a week, beginning the night before Thanksgiving.

She was a most successful teacher in the Elyria public schools, as Miss Harriet Howes, before her marriage to Mr. L. S. Metcalf, March, 1877. And as loving Christian wife and mother ever since she entered that large family she could not be excelled. Her life speaks for her, and is her best memorial. With all her home duties, none of which she ever neglected, Mrs. Metcalf found time for much outside work, which many a less frail and delicate woman would have considered an impossibility.

Her large Sabbath School class of boys, and the Boy's Mission Junior Club which she instructed at her home on Tuesday afternoons, were present at the memorial services, and will long remember the interest and devotion which their loving teacher brought to this work, which she considered of such importance that her busy life found room for it.

Mrs. Metcalf was active in all church work, where her loss will be greatly felt. She was one of the six charter members of the Woman's Foreign Missionary Society, which was organized twenty-five years ago, and held the office of vice-president at the time of her death.

In Memoriam.

Death has taken from the Senior Class one of its brightest members in the person of Ralph Metcalf. Ralph was highly esteemed by his classmates and the following note of sympathy sent to the family is expressive of the feeling of the class to him.

We want all to know how deeply we feel the death of Ralph, our dear classmate. It is not simply that our class numbers one less, but that we have lost one whom we greatly admired and loved for his conscientious faithfulness in all his school work and his sterling Christian character in his everyday life.

His successful and rising scholarship was an inspiration to us. Now he has gone to be with Christ in a higher school. We cannot know the depth of your sorrow, but we assure you of our heartfelt sympathy and would gladly bring you any comfort in our power.

In behalf of the Class of '95, E. H. S.,

HELEN GARDNER,
PERRY WILLIAMS,
BLANCHE MILLER.

Extract of Letter from N. M. Higgins of Shimeon & Higgins 32½ Threadneedle Street

"The reported death of your Mother has made me feel bad ever since. If there is one bright spot in my otherwise life it is the days & nights I spent in your household with you. It seems like a dream, at the time it was a revelation to me, as I had always been accustomed with a small family. The Complete happiness of your home circle & the motherly care which you all received and which was bestowed upon me and my associates as well more entitled to it had an influence for good upon me. God blessed you in the giving of such a Mother, and her memory will be worth more to you and to me than the triumphs of a lifetime.

Mrs Wm L. Smith, Wilbur, Lincoln Co. Washington

Mrs Pastor Foster. 109 Kurfurstan Str. Berlin. Germany

Martin Perry

There is a boy, his five years old
Since he was with us right in fold.
He is dear to me
By the great end mark,
Our relation, our lives did.

There is a disposed by they will keep
In the last knight in eyes.
He is an stroking
Are often into dreams.
What he is doing this keeps.

In the Grimms school there is a lad
named Ike
He came is a lad from Minnesota
He is a good student
And name a doctor.
He come to our hands through this
Liddie named Ike.

There is a young freshman called Ed,
I've known him since he was three years old
He is a kind boy.
It gives me great joy
To look on this freshman called Ed.

There is a tall senior named Ray.
He is my subject, not a stranger by
I love him in all
No words can tell
What I think of this senior named Ray.

There is a young woman named Ida
I've known her many years
For my speech sometimes she sat.
She comes out this to eat
And she tells me please read
This my little masterpiece, write.

Before we sit to eat a
Spider crept on our table.
Fork for mine.
My brother
I choose the other fork.

A very good and appreciative audience listened to a sermon at Plymouth Congregational church Sunday by the pastor's assistant, Mr. P. H. Metcalf. His subject was God's thought for humanity, and the sermon was replete with beautiful ideas expressed in terse and well-chosen English. God's thoughts are innumerable as are the sands of the sea and embrace everything we see in nature from the movement of the planets to the exquisite mechanism exhibited in the foot of a fly, which permits it to ascend the window pane. Not for one moment could we live if God's thought and care were withdrawn. The divine plan is to express this thoughtful care, leaving no one in doubt of it. Man's expression of his thoughts in words is feeble as compared with the infinite variety of expression which is given to God's thought. It is the glory of manhood and womanhood that human thought may follow after the divine; that we may think God's thoughts after him. Mr. Metcalf spoke with earnestness and fervor. It is the first time he has regularly filled the pastor's place and he did so to the entire satisfaction of his hearers. Dr. and Mrs. Frisbie are now spending their vacation in southern Minnesota.

for the taxes which is very unexpected to me as I
agreed with Mr Sargent some years ago that he would
pay all taxes on it for the use of it for pasturing until
I sold it Mr H Sargent wrote to me some more than
a year ago that he would buy the land I immediately sent
him word that he might have it, after waiting some
considerable I wrote again but have never heard from him
I did not know that there was any taxes to pay
you did not tell me how much the cost amounts to
nor what you will give me for it, I know not what
it is worth I would sell it cheap as I know not the value
of land in your town there for I would submit it to
you or some other person that is a better Judge than my self
and you may have it for what it is worth I do not wish
to have any advantage taken either way
Please write me how much you will give me for the
land excluding cost or how much it is

Yours with respect

John Smarton

I wish you to answer soon

9 MARSTON

F. Chase Esqr Manchester, April 3. 1849

Bristol town. April 3rd 1849

Mr Metcalf.

Dr Sir-

It is not probable that I shall be able to be up to you before some time on Thursday. and if you get so far along as to be in doubt what is best for you to do in running the Line. You can come back and take the land bounds over the located line from Parkers up: and at the same time lay out the Culverts - as far as the grade is established. We do not as a general rule put in any thing smaller than 3 feet in the clear. 3 feet high and of course as much larger as necessary. the Specifications provide that corrugated Culverts shall not be more than 5. feet in clear however. but I believe excepting Parkers Brook there is nothing large - There we shall probably put in an open Culvert or bridge -

The grade are as follows - The Lines Mr Emmett has with him - Grade Sta 396. 223.90

" " 412 235.90
430 241.30
" " 450 253.90
" " 454 253.90
" " 476 238.50
" " 484 238.50
" " 495. 245.10

There on probably Level for a short distance

I wish you to send me by the Morning Stage

a Memorandum of a Culvt. Made upon a page of the book you had from me.

You May Commence if you Should Come down, to lay out the Culverts at the Village of Goffstown sta 397.50. this has been laid out, but it was with a view of one foot higher grade. than is now in —

Yours Respectfully

Francis Chase

Concord, N.H. May. 1. 1857.

M. Isaac S. Metcalf

Dear Sir -

Through the kind-
ness of your father, Rev. S. M. Putnam, I have
ascertained your address, and write in be-
half of my son, S. F. Bouton. He is anx-
ious to obtain a situation on or connected
with some Rail-roads; either as assistant
surveyor and engineer, or clerk and paymas-
ter - for either of which situations he is well
qualified, with some experience, and can
bring the very best recommendations.

Rev M. Putnam informed me, that you
are in expectation of an appointment as Chief En-
gineer on a Road in Iowa - Should it be in your
power to offer a place to my Son - you will
greatly oblige. He is 20 years of age - diligent, ac-
tive - honest - and capable, and means to make Sur-
veying and Civil Engineering, his profession -

Should you have occasion to write at any time, within a few months - please direct - to S. F. Bouton

Concord, N. H.

Please make my kind regards to Mrs. Metcalf and her adopted sister.

Very respectfully
Yours &c.
S. Bouton.

FARM ON NORTH AND WINTERS STREETS.

Du Quoin, Ill., May 28 1896

O. S. Metcalf

Dear Sir

My Father came to
D & Quoin in the Spring
of 1857, and about that time
he purchased of C. H. Rogers
Rogers Home place several
town lots and a tract
of land adjoining in
all about 135 acres
and on this land was
planted the Winters
Peach Orchard
I now own and have
owned and occupied
for a good many years
the North half of this
land, lying South and
adjoining the Tract of
land owned by Peck
and Yale to Gillaw Bros

the time you sold your tract of land to Sellers Bros. North Street had not been opened under up to the land owned by you and we always supposed that was so for as it had ever been platted after Sellers Bros purchased the tract of land from you. They opened up North Street and had it platted the whole length of the land owned by me I find by examining the old plat of Rand M- addition to Dunlap, that there are lines showing that North Street had been run 370 feet further and then run to end of North St there is markings of a street running south at right angles from North Street running South some one hundred feet the markings on

[illegible] the making of this street through my land, and are trying to get the City Council to force me to open it up claiming that it belongs to the City. I would like to know what you know in regard to this, that will be of any benefit to me. Please answer by return mail and oblige much

Yours Truly

James W Winters

P.S.
I enclose a drawing of the [illegible] so you may remember how the land lays. Do you have any knowledge of any facts of this road and having been East St and that part of North St North of Lot [illegible] & [illegible] it was claimed by the City until of late it was sold to Sellers Bros by [illegible]

Monday Morning.

Mr Metcalf.

Dear Sir. As the time draws nigh when you will probably close your labors on the west side of the Mountain, it looks more likely that I shall not be able to be with you again. And as such seems likely to be the case. I write to say, that you had better stop at Claremont with the line. I suppose you may be now between the village of Newport and Claremont. And will perhaps get through, the present week, if so. I do not believe I can come up. I should like to hear from you, what are the prospects, and how you can get along about your payments, you will have some men to pay off, undoubtedly, and bills. How much will do it? Please say what of the horse and what disposal you will make of him bring him down. if he does not come before. If however you have not sent him by any one. when you receive this. you had better retain him. till you come yourself. I hope he is well before this. if not. they say here, his feet should be poulticed. with some soft matter, and the grease will come out.

Yours truly.

Feb 24

Troy House Troy March 16 1850

Mr. Metcalf

Dear Sir

Yours of the 9th and the report of the Engineer upon the A. & R. R. was duly received for which you have my thanks.

About a situation here. I would say that the directors have concluded to commence only a part of the road just at present and there seems to be more Engineers on the line already than ought to do the Engineering on the part which they propose to start. Hence the chance of a situation for any more as you will readily see is small.

As to informing you about a situation elsewhere Mr. A. R. Fields has charge of the Greenfield Branch but of the disposition that he intends to make about assistants I do not know, but which you can easily find out by writing him. But perhaps the most lucrative situation that I can inform you of is down in New Brunswick. I have received two letters from Fielding Neale Chief Engineer of the St. Lawrence and Quebec Rail Road making me an offer (which I shall not accept) to take charge of 90 miles of road which as far as I am concerned I will transfer to you. I think that if you find your own Transit and drawing instruments they pay you a salary of $1300 or $1400 per year

and Board you.

Mr. Neals address is at N. Londons Ct to answer

If You should make a bargain to go down East and should want to buy a Transit I would recommend you to call on Phelps & Gurley Troy N.Y. I think they have made great improvements on those that they first got out; the design is wholly dissimilar. they have lately built one for me different from any that they ever built before and I consider it worth $25 more although they make it for their usual price of $100 it has 2 telescopes with one telescope their price is $90

I think if they adopt an adjusting screw which I recommend they will have no more trouble about their instruments wearing. I had my plates made thicker than they usually make them which renders them less liable to get sprung

If you order them to make you an inst I think you will be the best satisfied to have them make it like mine If you should conclude to have but one telescope you might have it like mine with the exception that you want it arranged with but one telescope

The price will be 70 $ Ds

Mr Neals wrote me that they would want to commence operations about the first of may.

If you conclude to go and write me to that effect I will write Mr. Neals that I am not agoing to accept his proposition as he may expect one

and thereby prevent you in securing the situation

Yours truly

(1)

North Chelmsford, December 22d 1847.

To

M. W. Dashpan Esq;

Dear Sir;

In compliance with your wishes expressed to me during the month of October last, a reconnoissance was undertaken under my direction, to determine the practicability of a Railroad route from Manchester through Goffstown, Weare, Francistown &c to some point on the Connecticut river;— and I have now the pleasure to submit herewith such facts and results therefrom as may be necessary to exhibit the character of the country and feasibility of the enterprise.

Examinations were commenced at the Concord Railroad near the Manchester Depot, for a line striking across the Merrimack into the valley of the Piscataquog, and thence up the latter river as far as West Goffstown village—

The Concord road being at a height of about 56 ft. above the Merrimack and the land between them already appropriated for a compact manufacturing establishment, the difficulty of diverging from the immediate vicinity of the Depot seems to overbalance

the inconvenience of connecting with the Concord road about a half mile further down, where it is at a less height above the river — and below the American Manufacturing Co's. contemplated works. The crossing is however practicable at either place and a choice would probably in a great measure be influenced by the location of the Lawrence road, with which I presume it would be desirable to make the most immediate connection. From the mouth of the Piscataquog to West Goffstown, a line may be located for the most part on very feasible ground and with a grade line not exceeding at its maximum forty feet per mile. The north branch of the Piscataquog was now followed and for a distance of six miles presents a smooth and favourable valley, with a rise of not exceeding 20 ft. in the whole distance. This takes us to what was formerly Raymond's mills, at the foot of a succession of rapids extending as far as we follow the stream. A grade not exceeding 40 ft. per mile surmounts these rapids and passing the village of East Weare to the Cotton mill about four miles above Raymond's, we leave the stream and strike into Moose bog, which extends in a northerly direction about

two and a half miles into the town of Henniker.

This bog, forming the summit between the Piscataquog and Contoocook rivers, is elevated above the latter, below Henniker, about 136 feet and about 406 feet above the Merrimack at Manchester. The distance from the north end of the bog to Henniker village is about 3/4 miles and by winding around the easterly slope of the Craney hill and crossing a few heavy ravines the grade need not exceed 40 feet per mile — and that but for a portion of the distance.

You will perceive from the above, that the summit between the Piscataquog and Contoocook rivers, may be overcome with a maximum grade of 40 ft. per mile — and this embraces the first 25 miles of the route. —

The difficulty next to be encountered, was to cross the highlands between the Contoocook and Warner rivers; to surmount which it was found necessary to start with an elevation of about 40 ft. above the Contoocook and taking the only practicable route, up the valley of Annie brook, - extend a grade of 62 ft. per mile for about 1 3/4 miles to the gorge through which the road passes above Henniker village.

From the gorge to Bear pond, on the summit, distant about 2½ miles, a grade would be required, varying between 40 and 50 ft. per mile.— This summit is about 579 ft. above the Merrimack at Manchester or 174 ft. higher than the Moose log summit. The fall from Bear pond down to Warner river in the town of Bradford, does not exceed 80 ft., and may be overcome with an easy grade.

You was desirous that from this point, our examinations should proceed with a view to intersect with the Northern road at Lebanon and make the terminus of our route at the mouth of White river. To accomplish this, a line must pass to the east of Sunapee lake, on what is called the Chalk pond, or Stony brook route. I have had, but unsatisfactory examinations had already been made in that direction — and on passing over the first 7 miles with you, to Chalk pond summit I became convinced of the inexpediency of pursuing it. Subsequent accurate examinations made by my Assistants, sustain the opinion then expressed and show that we should have nearly 600 ft. to rise, in such distance that even could the grade

be equalized, it would require about 80 ft. per mile for about 7 miles.
In view of this difficulty it was thought best to turn our entire attention to a line by the foot of the lake and down the Sugar river to Claremont.
Sunapee lake is at an elevation of 975 ft. above the Merrimack and about 450 ft. above Warner river. An attempt was made to find a route past Bradford Mills, along the westerly shore of Todd's pond through Newbury village to the summit. It was however found impracticable, from the necessity of keeping on the low ground bordering the pond until the remaining distance was insufficient to rise in. We were therefore obliged to strike back more to the west and passing through Bradford plain and up the easterly side of Sunapee mountain, we surmount the summit by a grade plane of 60 ft. per mile, about 7½ miles in length.
About a half mile south of the lake, our line is obstructed by a ridge of solid rock extending from Sunapee mountain to the hill opposite, and over which the travelled road now passes. Its height is about 60 ft. above the lake and a tunnel or cut would be required through it for about 40 rods. In getting up from Bradford plain

along the eastern slope of the mountain, our route is rugged and being intersected by heavy ravines, would be the most difficult and expensive portion of the line. Nevertheless it is by no means insurmountable; nor need you despair of making its rough places smooth, while Yankee enterprise and ingenuity can be called to aid the undertaking.

From the south end of the lake, our route lay along its western shore for about two miles to the outlet of Spectacle pond. Following this outlet and rising slightly along the south side of the pond, we reach in the town of Wendall the main summit between the Merrimack and Connecticut rivers, elevated above the lake about 30 feet. The descent from this point into the valley of Sugar river and towards Newport is rapid — and to get down with a 60 ft. grade, the line must be circuitous, winding to the north of a direct line in order to keep on the slopes of the high land. About 4 3/4 miles of 60 ft. grade would be required between the summit and Newport village.

Between the villages of Newport and Claremont nothing was found that could be considered

a serious impediment, nor would any grade be required exceeding 40 ft. per mile.

I have been kindly favored with a communication from S. C. Chesborough Esq. engineer of the Sullivan Railroad, stating that the heaviest grades between Claremont and Windsor, occurs on the Claremont branch and descends at the rate of 60 ft. per mile for half a mile only.

I append hereto a table of heights and distances, showing the intermediate and aggregate distances and heights of important points on the line, which you will find useful data in instituting such more minute comparisons as a more advanced state of your affairs may call for.

In prosecuting our examinations, no regard was had to running the most feasible line between important points; but to determine the general character of the line and the extent of its worst difficulties was our sole aim. In many cases therefore measurements have been taken very far from where a line would in the end be definitely located and many of the field operations have been merely auxilliary, to arrive at main results. You will

therefore by no means consider this reconnoissance as determining a location, but merely as erecting a few monuments to show whoever comes after the extent of what he has to encounter.

Permit me to tender my thanks for the efficient personal aid rendered by yourself and associates in expediting our labors; and also for the uniform courtesy shown myself and Assistants by the numerous Gentlemen with whom our duties brought us in contact.

The State of Ohio,
LORAIN COUNTY, SS. } I, John W. Steele Judge of the PROBATE COURT, within and for the County of Lorain, in the name and by the authority of the State of Ohio, do by these presents MAKE KNOWN, that administration of all and singular, the Goods, Chattels, Rights and Credits, which were of Paulus Brown deceased, late of Oberlin in said County, is hereby granted to Isaac S. Metcalf whose duty it shall be to have all and singular the goods and chattels inventoried and appraised by Wm. P. Fearnis, John Gardner and O. M. Carter three suitable disinterested persons of said County, under oath or affirmation: and

FIRST, Shall make and return into said Court, on oath, within three months, a true inventory of all the moneys, goods, chattels, rights and credits of the deceased, which have or shall come to his possession or knowledge, and also, if required by said Court, an inventory of the real estate of the deceased:

SECOND, Shall administer according to law, all the moneys, goods, chattels, rights and credits of the deceased, and the proceeds of all his real estate that may be sold for the payment of said decedent's debts which shall at any time come to his possession or to the posession of any other person for him

THIRD, Shall render upon oath, a true account of his administration, within eighteen months and at any other times when required by said Court or the law.

FOURTH, Shall pay any balance remaining in his hands upon settlement of his accounts to such person as the Court or the law shall direct, and

FIFTH, Shall deliver the Letters of Administration into said Court, in case any Will of the deceased shall hereafter be duly proved and allowed.

And we do hereby appoint the said Isaac S. Metcalf Administrator of all and singular, the said goods, chattels, rights, credits and estate, which were of the said Paulus Brown in his life time.

In Testimony Whereof, I have herounto set my hand and affixed the seal of said Court, at Elyria, in said County, this Seventh day of July 1870

John W. Steele Probate Judge.

To the County Surveyor of Lorain County, Ohio.

I, E. G. Johnson Auditor of Lorain County, State of Ohio, certify that on the list of lands returned by the Treasurer of said County, delinquent for the year 1868, in Range 18 Town. 5 Sec. ~~Blank~~ Oberlin Enlgt Pt Lot 1 + 2 Lot 96 20 Acres of land stands charged with 2 Dollars 9 Cents and 5 Mills, being the tax, interest and penalty for the year 1868, and the simple tax for the year 1869, in the name of Paulus Brown and which aforesaid list, including the aforesaid tract of land, was duly advertised agreeably to law; and the said 2 dollars 9 cents and 5 mills, remaining unpaid on the ~~second Monday~~ 3rd Tuesday of January 1870, the time appointed in and by said Advertisement for the sale of lands set forth on said list, the said 20 Acres were by John H Boynton Treasurer of the County aforesaid, exposed to sale at the Court House, in Elyria, in said County, on the ~~second Monday~~ 3rd Tuesday of January, 1870, between the hours of ten o'clock in the forenoon and six o'clock in the afternoon. At which said day and place came I S Metcalf who bid to pay said 2 dollars 9 cents and 5 mills, for 2 5/100 Acres, being all of the tract above mentioned. And there being no bidder who would pay the tax aforesaid, for a less number of Acres, the said 2 5/100 Acres were struck off and sold to the said I. S. Metcalf for the sum of 2 dollars 9 cents and 5 mills, aforesaid. ~~Which said tract of ... so purchased by the said ... is to be surveyed by metes and bounds, by lines parallel with said tract, and in the northwest corner of the same, and in as near a square form as practicable.~~

Given under my hand, at Elyria, on the 19 day of January 1870.

E. G. Johnson Auditor.

Memorandum of an Agreement

April, 1843

Charles W. Rich, Yeoman & Isaac L. Metcalf, gentleman & laborer.
Milo, Piscataquis Co., Maine.

C. W. Rich agrees to let that part of his farm in Milo, lying south of the E. & W. road, to I. L. Metcalf, for the summer season of the year 1843.

I. L. Metcalf agrees to perform all the usual and necessary labor of carrying on and managing the said farm; preparing the ground, getting in, cultivating, taking care of, and securing all the crops, &c. &c., in a proper manner, & to the best of his ability.

Wheat is to be sown upon the interval, where potatoes grew last year. Twenty five good loads of manure to be put upon the old Millet ground and planted with potatoes. The rest of the manure to be put on the field near the Old house; the old ground planted with corn, the rest with potatoes, except perhaps a garden spot. The upper field on the interval to be sowed with wheat and peas. A piece of grass ground may be broken up, and sowed with Oats, if it is convenient, and the seed is found.

Rich is to furnish all the Seed, manure, and ox-work, the use of cart, ploughs, harrows &c. &c.

Metcalf is to put up the fences, if they are not destroyed by the freshet, and is to have the whole care & management of the farm.

The Grain and Root crops are to be divided equally; the grain to be threshed and measured, and the roots put in the cellar.

One third part of the whole quantity of hay, taking only such as is good & saleable, shall belong to Metcalf. The other two thirds of the hay, and all of the Straw, shall be put in the barn for Rick.

Metcalf agrees to pay 1/3 of the whole highway tax on property & no other.

Metcalf is to have the use of the oxen one half of the time, say Tuesday, Wednesday, and Thursday of each week, if so much is required.

Metcalf agrees to do 5 days work for Rick extra, wherever required.

Geological Position))) These Ores belong to the Class known as Haematites and are associated with the Carboniferous limestones which lie immediately below the Coal Measures, This system of rocks is largely developed throughout the southern border of the State and this Association of Ores is by no means unfrequent but nowhere that I am aware, on so grand a Scale

The Heimatites are seldom found like the Carbonates of the Coal measures in continuous Strata, but in Particular Shaped Masses known among Miners as "pockets" and are seen to line the sides of pre-existing fissures wher they often assume the Stalactite form. Their range from their very mode of occurrence is very restricted and by no means Coter Minus with the rocks with which they are associated

Topography of the Iron district

... About two and one half Miles west of the Rail Road and nearly four miles North of Jonesboro on section 34 Town 11 S. Range 2 west there occurs a ridge bearing East of North and West of South which rises quite abruptly to the height of More 200 feet above the adjacent country, running out to the east in numerous projecting spurs while the western Slope is more uniform and less precipitous. This ridge has already received very appropriately the name of the Iron Mountain

Range and Extent

Starting from the Valley of Huggins Creek the mass is seen forming a somewhat precipitous Scarp until a height

of at least fifty feet is obtained. following up the first Ravine very soon large fragments of Ore are observed - under circumstances which leave no doubt that they have Ridden from the adjacent banks, these indications exist in very many of the Ravines and occur at about the same altitude

Near the Centre of the Section there is one Ravine very precipitous where the soil has so far been removed as to reveal the true relations of this Ore to the associated rocks. It is found to be frequently in a State of absolute purity, but for the most part Chert is intermingled The Mass frequently ~~frequently~~ crops out from the hillside in ledges from five to ten feet thick and from the lowest point where the Ore was observed to the highest (and if the Explorer exercises proper Scrutiny he will be satisfied that the whole intermediate Space is of the same Character) the distance is by measurement 70 feet — and indications of Ore are observed ten feet higher up — and since we failed to see the bottom it would be no Exageration to place the Combin'd thickness at 80 feet it be wrong to infer that the whole would be fit for the furnace, but the Assertion is made that it would be found profitable to assort nearly the intire mass where its Exploration is undertaken

Besides, as the pure Ore is more liable to disintegration from the action of the atmosphere than the accompanying Chert it is probable that the weather'd portions which now appear as projecting Ledges are more impure than those which are Conceal'd by the soil. The exposure of Ore in this one Region is sufficient to stock a furnace for a long while and it may be worked either by Stripping or by open Quarry.

Proceeding Southward the indications of Ore become less abundant, as the Slopes become more gradual and the

amount of superficial material increases. in a few instances pits have been sunk through the Sup. formation evidencies of the existence of this ore beneath. Y
ascending to the summit which is quite abrupt all traces of the ore are lost. Cropping to the western Slope heavy ledges of Chert emerge near the top. further down on the surface we collected specimens of pure Ore from an old digging from which two or three tons had been taken, but which was now so far filled up as to conceal the bed. It is not unfrequent to meet with specimens on the western flank but they are by no means so abundant as on the Eastern, for the reason perhaps, the slope is more gradual, the ravine less deep barely exposing the adjacent rock and the earthy materials were abundant. From all of the circumstances I have no doubt that this deposit extends laterally through the above ridge
These ores are most largely developed on the eastern Slope of Section 34 T. 11 S. R. 2 W. proceeding Southward the traces become less numerous on the adjoining Section 3 T. 12 R. 2 W. while in the Section next succeeding they fail altogether. Their extension east and west is equally restricted. They have not been observed on Section 14. while on Section 3 the evidence of their occurrence is scanty. Dr Gorgas of Tuscaloosa who has carefully endeavored to determine their range and extent, estimates the area at 2½ miles in length and not much more than a mile in width
From what I saw of these ores, and from what I know of their mode of occurrence in other regions

laterally through the above lines
These ores are most largely developed on the eastern
slope of Section 34 T. 11 S. R. 3 E. proceeding southward the
traces become less numerous on the adjoining Section
3 T. 12 R. 2 W. while in the Section next succeeding they
fail altogether. Their extension east and west is
equally restricted. They have not been observed on
Section 14 while on Section 2 the evidence of their
occurrence is scanty. Dr. Congdon of Jonesboro
who has carefully endeavored to determine their range
and extent, estimates the area at 2½ miles in length
and not much more than a mile in width
From what I saw of these ores, and from what I
know of their mode of occurrence in other regions

April 26 Wordens two cows in Pasture.

NORTHERN SECTION. The weather for the first and last part of the week was hot, while during the middle of the week the days were only moderately warm and the nights were cool, light frosts being reported from several counties on the morning of the 22d in low exposed localities, but the damage done was very slight. The rains during the week have been light and scattered, and have not been of much substantial benefit, and in many counties water is scarce, and the ground too dry and hard for fall plowing. Corn continues to look well in nearly all parts of the section, but in several counties on the uplands it has been affected by the dry weather. Early potatoes are ripe and many of them dug, and late potatoes are in a promising condition. Millet has made small growth. Fall plowing for wheat is well advanced, except when delayed by the ground being dry and hard. Pastures show an improved condition in many counties, but in several they are badly dried up, and stock water is scarce. Some grapes are ripe and on the market. Most of the fruits are fair to good.

Aug. 26

LORAIN. Rain on the 24th did much good. Corn is doing well. Grapes will, many of them, be ready to ship by next week. Ground in good shape for fall plowing. Oberlin, 70, trace.

NORTHERN SECTION. The weather has been very warm during the week, and abundant rains have fallen in all or nearly all of the counties. Corn is generally in fine condition, is earing well and is maturing rapidly, being nearly ready to cut in several counties. Late potatoes are generally in good condition, except that blight is reported as doing some damage, and one or two reports of damage by grubs. Millet and fodder corn have made much improvement. Root crops and gardens are looking better. Cider making has begun. Fall plowing is well advanced and in many counties nearly completed; ground is generally in good condition. Pastures are much improved, but in many the grass is still short. Buckwheat is filling well. Some fields of seed clover are filling well, while others are reported as in poor condition. Sweet corn and tomatoes, raised for canning, are in good condition.

LORAIN. Corn is earing well. Grape picking will be going on next week. Fall plowing for wheat is well advanced. Late potatoes look well. Root crops and gardens are in good condition. Oberlin, 74, 1.07.

NORTHERN SECTION. Splendid rains have fallen in nearly all of the counties of this section. The days have been quite warm, but the morning of the 2nd was quite cool, and a light frost was reported from several low exposed localities, but did no damage. The condition of all growing vegetation, not already past recovery, was greatly improved, and stock water is now plenty. Corn is maturing rapidly, is well eared, and cutting has begun in many places. Late potatoes continue to look well, but a few fields are in danger of injury by rotting on account of excessive moisture. Clover for seed is well filled, but is thin on the ground. Fodder corn and millet are doing well, also turnips and onions. Gardens are in a much improved condition. Pastures and meadows are greening up nicely, and stock is in better condition. The ground for fall seeding of wheat and rye has been nearly all plowed, and a few fields have been sown, but most farmers are waiting till a little later in the season. The ground is generally in fine condition for seeding, but a few fields are a little too wet.

LORAIN. Plowing for wheat is largely done. Corn is doing well. Pastures and meadows show much improvement. The ground is well soaked by recent rain. Oberlin, 69, 0.66.

NORTHERN SECTION. The weather was excessively hot till the 12th or 13th, when it became much cooler. Heavy, and in some places excessive, rains fell throughout the eastern half of the section, but in the western half the showers were light and scattered. Some damage was done to crops in portions of the eastern half by high winds and the washing of the soil. The ground in the eastern half of the section is generally in good condition for the growing crops and for seeding, while in the western half many fields are too dry and farmers are waiting for more rain before seeding. Corn is generally well eared and is ripening rapidly, many have begun cutting. The greater part of the fall wheat and rye crop has been put in, and the early sown wheat is coming up nicely. Some potatoes have been dug; a few fields have been damaged by blight, and some others in eastern part are threatened with rotting. Tobacco, in the few counties in which it is raised, is being harvested. Clover for seed is being cut. Pastures and feed in the eastern part look well and the water is plenty, while in the western part many pastures are dry and brown and water is still scarce.

LORAIN. Quite warm, and splendid weather for maturing corn, and a little has been cut. Wheat is being sown. Clover for seed being cut, and is well filled. Grape harvest is in progress. Hail storm on 12th, but damage was slight. Oberlin, 74, 0.88.

NORTHERN SECTION. The early part of the week was cool, and light frosts were reported on the morning of the 15th from several low and exposed localities, but the damage done was very slight. The latter half of the week was excessively hot, and especially so for this season of the year. Showers in several places quite heavy, were general from 16th to 18th inclusive, but since that time no rain of any consequence has fallen. The sunshine for the week has been above the average for this time of year. Corn is ripening rapidly, is generally well eared, and much of the crop has already been cut; the fodder of many fields that has not been cut is drying badly. Wheat seeding where not completed is progressing rapidly, and the ground is generally in good condition; fields that were sown early are coming on nicely, with but few exceptions. Tobacco is nearly all cut. Potatoes are being dug, and some fields are rotting. Rye is being sown. Fodder corn and millet are doing well. Clover seed being threshed, seed of good quality. Fruit is being gathered, and is generally in good condition. Cider making in progress. Meadows and pastures in part of the counties look well, but in others the pastures are short and brown. Stock water is scarce in several of the western counties.

LORAIN. Corn cutting is progressing rapidly. Wheat seeding nearly completed. Grapes are being harvested. Oberlin, 68, 0.11.

NORTHERN SECTION. The weather immediately preceding and during the first of the week was excessively hot for the time of year, but beginning with the 23d was more seasonable, but the temperature has averaged slightly above the normal for most of days of the week. Light rains have fallen, mostly on the 25th and 26th. Light frosts were general on the 24th and 28th, and were also reported from several counties on the 23d, 25th and 26th; the frosts of the 24th and 28th were reported as heavy on low mucky ground in several places, but the damage was very slight in all sections. The week has been favorable for the maturing and harvesting of crops, but more rain is needed in most of the section, to give winter grain a good start, for meadows and pastures, and for wells and stock water. Corn is well eared, it is mostly cut and in shock, and is in fine condition throughout the section. Wheat seeding is about completed, and early sown is coming on nicely. Potato digging is progressing, and the crop is generally satisfactory and of good quality, but a few fields have been damaged to some extent by rotting, caused, probably by local heavy showers and hot weather. Apples being picked and stored, and cider made. Buckwheat has been mostly cut. Pastures and meadows show an improved condition, but many meadows are badly killed out and are being plowed for spring crops. Corn and fodder corn has been cut and other fields are still green.

if drouth is broken soon. Apples dropping.

NORTHERN SECTION. The drouth continues throughout the section, and no rain has fallen during the week except light scattered showers along the lake shore. The days have been warm and the nights cool. The week has been a favorable one for haying and harvesting. The wheat harvest is well advanced, with a light yield but quality generally good, except some fields that were quite badly rusted. Oats are turning some, with the prospect for a crop not materially changed. Corn has not as yet been materially affected by the dry weather and generally looks well, especially on black ground. Potatoes are showing the effects of the drouth and are not setting well. Haying is well advanced, and the crop is being cured in good condition, but the yield is very light. Pastures are badly dried up and stock water is scarce, many are feeding cattle. Grasshoppers are numerous and damaging vegetation in ...al counties. Apples are dropping badly, and small fruits are drying on the bushes. Gardens are in poor condition.

July 8

LORAIN. Weat being cut; short straw, but good berry. Corn and oats doing well. Potatoes blossoming and look well. Oats have retrograded. Gardens are doing fairly, but must have rain soon. Pastures dry. Water scarce. Hay crop very light.

Temperature 71 — 67
Precipitation .69 .04
Sunshine 55 73

...and oats. ...ile quinces and ...pears dried are beginning, wild berries drying up, otherwise fruit conditions are fair.

NORTHERN SECTION. The drouth continues, and no rains of any consequence have fallen during the week. The days have been warm and the nights cool, and light frosts on the lowlands were reported from several counties, but no damage was done. Wheat is nearly all harvested, and threshing has begun, yield variable. Haying is nearly completed, and the crop has been secured in good condition but with a light yield. Oats are turning rapidly, and a few have been cut. The yield of clover seed is good in some counties, and nearly a failure in others. Corn is holding its own very well considering the dry weather, and on low black ground is looking well. Potatoes are showing the affects of the drouth and are not growing much, although the tops look promising. Gardens and pastures are badly dried up and stock water is becoming scarce; many are feeding stock. Apples continue to fall badly, and much of the small fruit is drying up.

July 15

LORAIN. Wheat about all cut, will be about half a crop. Corn and potatoes looking well. Oats ripening, cutting will begin next week. Pastures almost gone. Timothy not more than one-third crop. Second growth clover very poor. Early apples ripening. Prospects for fruit fair.

Temperature 71 70
Precipitation .69 .09
Sunshine 55 73

...local in character, even where improvement occurred.

NORTHERN SECTION. Good rains fell in the early part of the week, and in the eastern half of the section they were quite heavy. The days have been quite warm, unusually so during last three days of the period. The condition of all vegetation has improved, and in the eastern half the change for the better has been quite decided. The threshing of wheat has begun, the yield being generally light, and in several counties of poor quality. Oats are ripening, in some places the harvest has begun, the yield seems to be good in most counties. Corn is doing very well, but in some places is quite uneven. Potatoes show some improvement, but the ground is too dry for a good development of the tuber. Pastures are still badly dried up, and frequent rains will be necessary to put them in good condition. Stock water is scarce in many places, and in some localities stock feeding is still necessary. Gardens are looking better than one week ago. Large fruits continue to drop, especially apples, and small fruits have dried badly on the bushes.

July 22

LORAIN. Wheat harvested, threshing begun, yield better than expected. Haying about over, crop light. Oats turning rapidly, and promise a good yield. Corn is doing fairly well. Potatoes need rain. Pastures are very dry. Oberlin, 74, 0.28.

Temperature 71 73
Precipitation .9 .81
Sunshine 72 77

...promising. Apples and ...Some wheat threshed ...still.

NORTHERN SECTION. Although no general rains have fallen over the section during the week, good local showers have fallen in nearly all counties, but in several the drouth continues. During a part of the week the nights have been quite cool, but in general the weather has been favorable for growing crops. Wheat is all harvested, and either threshed or housed, the yield is reported as poor to fair. Oats are being harvested, and although the straw is generally short, the heads are well filled and the yield in most counties will be good. Corn is growing nicely, many fields are in tassel, and in some the ears are forming. Potatoes show improvement over a week ago, and many fields are reported as in a promising condition, but the ground is too dry for the tubers in several counties. Pastures are still dry and short, but many are greening up a little. Stock feeding is necessary in many places. Much corn has been planted for fodder. Some timothy is being cut for seed. Apples continue to fall, but still promise a fairly good crop. Gardens are looking somewhat better than last week.

July 29

LORAIN. Oats being cut, good yield expected. Corn looking well. Potatoes badly in need of rain. Beans doing well. Nearly all are feeding stock as pastures are bare. Much corn planted for fodder. Oberlin, 74, 0.15

Temperature 73 72
Precipitation .65 .51
Sunshine .55 .63

...pears and prunes are ... Many ... potatoes all cut ... will ...

NORTHERN SECTION. No rains have fallen during the week, except light and generally local showers. The days have been warm, but the nights were cool. The condition of all growing crops has somewhat improved during the week on account of good rains of the week previous. Oats are nearly all harvested, and the yield is reported as good, and in many counties as excellent. Corn has made good progress during the week and is looking well, except that many fields are uneven on account of replanting early in the season; it is generally in tassel and much is silking. Potatoes are looking some better, and are generally of good quality. Clover seed is a light crop. Pastures are still brown and bare, but look a little better. Fall plowing for wheat has begun, but some fields are too dry.

Aug. 5

LORAIN. Corn is doing fairly well, but is in need of rain and nights have been too cool. Oats about all cut, good crop promised. Potatoes improving. Pastures bare. Oberlin, 66, trace.

Temperature 72 66
Precipitation .82 .16
Sunshine 55 74

...still plentiful in many localities. ...all cut and promise ...

NORTHERN SECTION. Good rains fell during the week, greatly benefiting corn, pastures, meadows, late potatoes and gardens. Corn is in tassel and earing out well; on high ground and clay land the prospect is not good, but on low, black land it is reported as b ing up to the average or above. Oats about all harvested and much of it threshed, the yield is better than expected. Early potatoes are generally poor in quality and but few in hill; late promise a fair yield. Pastures short but beginning to turn green. Small clover poor, Mammoth generally from fair to good. Apple trees are generally heavily loaded with fruit, but in some sections the crop will not be up to the average. Pears are generally good, also grapes and plums in some localities. Farmers generally engaged in plowing for wheat.

Aug. 12

LORAIN. Corn on low and rich land looking well, on high ground small. Tobacco small and backward, but little planted. Old meadows badly damaged by drouth. Oats promise a fair crop. Pastures and meadows starting since the rains.

Temperature ... ...
Precipitation .49 1.11
Sunshine 55 68

...springs, wells and streams ... MEDINA. Corn ... low ...

NORTHERN SECTION. The week has been warm and sunny, with good showers, occasionally heavy, on first two days, and the weather has been very favorable for all growing crops. A few fields of oats in shock were damaged by the heavy showers, but most of the crop has been secured in good condition, and where it has been threshed the yield is reported as very good and of excellent quality. Corn is making an excellent growth and is earing well; the crop promises to be a very good one. Early potatoes are generally large and of good quality, but are few in a hill; late potatoes are doing well. Pastures are generally short, but are greening up in most of the counties and show a decided improvement. Plowing for wheat is well under way, and the ground is in good condition. The second crop of clover in many fields promises to be better than the first crop. Millet is making rather small growth. Some counties report the fruit crop, especially apples, as very abundant, while other counties report enough for home use. Grapes are not plenty but are of good quality, and picking has begun. Buckwheat is filling well.

Aug. 19

LORAIN. Corn and grapes doing well. Plowing for wheat well under way. Oberlin, 75, 0.76.

Temperature 70 70
Precipitation .81 .90
Sunshine 55 .86

...Corn doing finely. Tobacco ...

NORTHERN SECTION. The weather for the first and last part of the week was hot, while during the middle of the week the days were only moderately warm and the nights were cool, light frosts being reported from several counties on the morning of the 22d in low exposed localities, but the damage done was very slight. The rains during the week have been light and scattered, and have not been of much substantial benefit, and in many counties water is scarce, and the ground too dry and hard for fall plowing. Corn continues to look well in nearly all parts of the section, but in several counties on the uplands it has been affected by the dry weather. Early potatoes are ripe and many of them dug, and late potatoes are in a promising condition. Millet has made small growth. Fall plowing for wheat is well advanced, except when delayed by the ground being dry and hard. Pastures show an improved condition in many counties, but in several they are badly dried up, and stock water is scarce. Some grapes are ripe and on the market. Most of the fruits are fair to good.

Aug. 26

LORAIN. Rain on the 24th did much good. Corn is doing well. Grapes will, many of them, be ready to ship by next week. Ground in good shape for fall plowing. Oberlin, 70, trace.

NORTHERN SECTION. The weather has been very warm during the week, and abundant rains have fallen in all or nearly a... of the counties. Corn is generally in fine condition, is earing well and is maturing rapidly, being nearly ready to cut in several counties. Late potatoes are generally in good condition, except that blight is reported as doing some damage, and one or two reports of damage by grubs. Millet and fodder corn have made much improvement. Root crops and gardens are looking better. Cider making has begun. Fall plowing is well advanced and in many counties nearly completed; ground is generally in good condition. Pastures are much improved, but in many the grass is still short. Buckwheat is filling well. Some fields of seed clover are filling well while others are reported as in poor condition. Sweet corn and tomatoes, raised for canning, are in good condition.

LORAIN. Corn is earing well. Grape picking will be going on next week. Fall plowing for wheat is well advanced. Late potatoes look well. Root crops and gardens are in good condition. Oberlin, 74, 1.07.

NORTHERN SECTION. Splendid rains have fallen in nearly all of the counties of this section. The days have been quite warm but the morning of the 2nd was quite cool, and a light frost was reported from several low exposed localities, but did no damage. The condition of all growing vegetation, not already past recovery, was greatly improved, and stock water is now plenty. Corn is maturing rapidly, is well eared, and cutting has begun in many places. Late potatoes continue to look well, but a few fields are in danger of injury by rotting on account of excessive moisture. Clover for seed is well filled, but is thin on the ground. Fodder corn and millet are doing well, also turnips and onions. Gardens are in a much improved condition. Pastures and meadows are greening up nicely, and stock is in better condition. The ground for fall seeding of wheat and rye has been nearly all plowed, and a few fields have been sown, but most farmers are waiting till a little later in the season. The ground is generally in fine condition for seeding but a few fields are a little too wet.

LORAIN. Plowing for wheat is largely done. Corn is doing well. Pastures and meadows show much improvement. The ground is well soaked by recent rain. Oberlin, 69, 0.66.

NORTHERN SECTION. The weather was excessively hot till the 12th or 13th, when it became much cooler. Heavy, and in some places excessive, rains fell throughout the eastern half of the section, but in the western half the showers were light and scattered. Some damage was done to crops in portions of the eastern half by high winds and the washing of the soil. The ground in the eastern half of the section is generally in good condition for the growing crops and for seeding, while in the western half many fields are too dry and farmers are waiting for more rain before seeding. Corn is generally well eared and is ripening rapidly, many have begun cutting. The greater part of the fall wheat and rye crop has been put in, and the early sown wheat is coming up nicely. Some potatoes have been dug; a few fields have been damaged by blight, and some others in eastern part are threatened with rotting. Tobacco, in the few counties in which it is raised, is being harvested. Clover for seed is being cut. Pastures and feed in the eastern part look well and the water is plenty, while in the western part many pastures are dry and brown and water is still scarce.

LORAIN. Quite warm, and splendid weather for maturing corn, and a little has been cut. Wheat is being sown. Clover for seed being cut, and is well filled. Grape harvest is in progress. Hail storm on 12th, but damage was slight. Oberlin, 74, 0.88.

NORTHERN SECTION. The early part of the week was cool, and light frosts were reported on the morning of the 15th from several low and exposed localities, but the damage done was very slight. The latter half of the week was excessively hot, and especially so for this season of the year. Showers in several places quite heavy, were general from 16th to 18th inclusive, but since that time no rain of any consequence has fallen. The sunshine for the week has been above the average for this time of year. Corn is ripening rapidly, is generally well eared, and much of the crop has already been cut; the fodder of many fields that has not been cut is drying badly. Wheat seeding where not completed is progressing rapidly, and the ground is generally in good condition; fields that were sown early are coming on nicely, with but few exceptions. Tobacco is nearly all cut. Potatoes are being dug, and some fields are rotting. Rye is being sown. Fodder corn and millet are doing well. Clover seed being threshed, seed of good quality. Fruit is being gathered, and is generally in good condition. Cider making in progress. Meadows and pastures in part of the counties look well, but in others the pastures are short and brown. Stock water is scarce in several of the western counties.

LORAIN. Corn cutting is progressing rapidly. Wheat seeding nearly completed. Grapes are being harvested. Oberlin, 68, 0.11.

NORTHERN SECTION. The weather immediately preceding and during the first of the week was excessively hot for the time of year, but beginning with the 23d was more seasonable, but the temperature has averaged slightly above the normal for most of days of the week. Light rains have fallen, mostly on the 25th and 26th. Light frosts were general on the 24th and 28th, and were also reported from several counties on the 23d, 25th and 26th; the frosts of the 24th and 28th were reported as heavy on low mucky ground in several places, but the damage was very slight in all sections. The week has been favorable for the maturing and harvesting of crops, but more rain is needed in most of the section, to give winter grain a good start, for meadows and pastures, and for wells and stock water. Corn is well eared, it is mostly cut and in shock, and is in fine condition throughout the section. Wheat seeding is about completed, and early sown is coming on nicely. Potato digging is progressing, and the crop is generally satisfactory and of good quality, but a few fields have been damaged to some extent by rotting, caused, probably by local heavy showers and hot weather. Apples being picked and stored, and cider made. Buckwheat has been mostly cut. Pastures and meadows show an improved condition, but many meadows are badly killed out and are being plowed for spring crops. Corn and fodder corn has been cut and other fields are still green.

September 24th to 30th—Dry.

PROGRESS OF CROPS IN OHIO, AS AFFECTED BY WEATHER CONDITIONS DURING 1895.

The month of December, 1894, was marked by an excess in both temperature and precipitation. During January the temperature was slightly below the average, but somewhat above as to precipitation, while February was characterized by abnormally cold weather and an unusual deficiency as regards precipitation. In March both temperature and precipitation were below the average. The snowfall during the winter, while perhaps not as ample nor aswell distributed as usual, afforded a fair amount of protection to cereals in ground, but in those portions of the state where unusually light considerable wheat was winter-killed. The cold weather that prevailed during January, February and March proved to be of considerable injury to peaches, but most fruit escaped serious damage. As a whole, the month of March was unfavorable and injurious to cereals in ground, and delayed farm work by the continued low night temperatures, freezing the ground and preventing its cultivation.

Week ending April 8th—Normal temperature with precipitation deficient. Oats and clover seeding well advanced; some clover coming up. Wheat starting to grow. Tobacco and early potato planting under way. Plowing for corn was general. Ground plowed and in fine condition. Grass made little progress. Small fruits in fair shape. Fruit trees coming in bud.

Week ending April 15th—Temperature average, rainfall above, weather cloudy, heavy frosts 10th and 11th, no special damage. Wheat, oats, grass, barley, rye and clover decidedly improved. Wet ground delayed sowing. Some corn and millet sown. Gardens not all made. Fruits trees budding and promising, except peaches.

Week ending April 22d — Fair and cool with some frost, rainfall deficient. Growth of cereals retarded, but weather favored plowing for corn, some planted. Oats and clover coming up. Apples, peaches, plums and strawberries budding.

Week ending April 29th—Temperature above average, rainfall below, weather fair. Wheat thin and yellow in Northern section, improved elsewhere. Cool nights retarded grass, clover and pastures. Oats did well, also early potatoes. Corn planting progressed fairly. Fruit blooming.

Week ending May 6th—Excessive warmth and dryness retarded growth of wheat, oats, grass, potatoes and tobacco. Cereals fair, but need rain. Corn planting progressed. Early planted corn and potatoescoming up. Fruit bloom heavy.

Week ending May 13th — Warm, with rainfall deficient, but some improvement in wheat, oats and grasses where rain was sufficient. Corn and potatoes coming up. Tobacco hurt by drouth and insects. Frosts on 12th and 13th caused considerable damage to fruit, gardens and cereals.

Week ending May 20th—Cool, with rainfall deficient. Condition of crops materially changed. Traces of snow 14th. Frosts, 15th to including 18th, that on 17th was most severe; corn and potatoes were cut to the ground, many grapes and berries were killed, wheat, clover and barley damaged to some extent. Wheat heading out short. Oats and grass made some improvement. Cut worms and flies hurting crops.

Week ending May 27th—Dry and cool, with frosts from 20th to 23d, inclusive, which killed greater portion of grapes and berries; corn that was up and some of the large fruit and wheat, oats and barley in low places were injured somewhat. Grass and tobacco affected by drouth. Strawberries ripening.

Week ending June 3d—Warm and very dry, scarcely any rain. All crops suffering. Tobacco plants dying. Replanted corn coming up. Potatoes recovering. Apples promising. Berries in bloom.

Week ending June 10th—Warm, drouth partially broken evening of 4th. Wheat, grass, corn, potatoes and gardens slightly improved. Replanted corn made some advance. Wheat heads filling and ripening. Some tobacco transplanted, plants scarce. Strawberry season well advanced.

Week ending June 17th—Warm. Rainfall light. Corn and potatoes made some advance; other crops retarded by drouth. Wheat ripening, heads only fair. Some wheat, clover and barley cut. Oats and grass short. Tobacco plants dying.

Week ending June 24th—Temperature and rainfall about average. Corn, oats, potatoes, pasturage and gardens benefitted. Wheat harvest general in southern portion, some cut in middle section, ripening in northern. Barley, rye and clover yields light. Apples and pears promising.

Week ending July 1st—Warm, with deficient rainfall. Wheat harvest begun northern section, well advanced elsewhere. Hay cutting progressed. Oats, pastures, potatoes and tobacco slightly improved. Corn made some growth.

Week ending July 8th—Temperature and rainfall below average, rather dry middle and northern sections. Conditions favored wheat and hay harvest. Corn, oats, late potatoes and tobacco southern section improved, retarded elsewhere. Pastures poor. Water becoming scarce.

Week ending July 15th—Rather dry with less warmth than usual. Favorable for haying and harvesting. Oats ripening, some cut. Corn in fair condition. All crops need soaking rain. Water scarce. Pastures poor.

Week ending July 22d—Warm, rainfall above average, except in western half where drouth continues. Some improvement eastern portion. Conditions favored haying, oat harvest and wheat threshing. More rain needed. Tobacco suffering. Apples ripening.

Week ending July 29th—Temperature about average, rainfall deficient. Drouthy western portion; showers caused some improvement in eastern half. Wheat threshing well advanced. Oats turning out better than expected. Tobacco variable condition. Some tobacco "topped."

Week ending Aug. 5th—Cool and dry. Crops retrograding. Oats threshing fair. Corn fair on lowlands and black soil and is earing, on clay soil poor. Pastures about gone. Tobacco not doing well. Tree fruits ripening.

Week ending Aug. 12th — Abnormally warm, some good rains, but poorly distributed. Drouthy western portion, improvement elsewhere. Tobacco poor. Some fall plowing done. Chinch bugs and grasshoppers still numerous in some localities. Millet did not do well. Water and pasturage scarce.

Week ending Aug. 19th—Warm with deficient rainfall. Showers early and late in week caused some improvement. Tobacco, pastures, potatoes and many garden poor. Corn, except on ridges and clay soil in good condition. Buckwheat in bloom and filling well. Some millet cut. Early potatoes being dug. Melons, tomatoes, cucumbers and pumpkins promising. Grapes ripening.

Week ending Aug. 26th— Temperature average—warm days, cool nights, dry. Crops at standstill or retrograding. Light frosts 22d in some places, no damage. Water very scarce in many counties. Fall plowing progressed slowly. Apples dropping badly. Some cider made. Plums ripening. A few grapes in market. Tobacco "firing" badly. Clover being cut and threshed for seed.

Week ending Sept. 2d—Drouth broken. Weather warm. All vegetation shows improvement, but rain too late to materially benefit crops in some places. Ground in good condition for plowing. Water more plentiful. Pastures greening up.

Week ending Sept. 9th—Average warmth, rainfall excessive in northern portion, deficient elsewhere. Light frost in some places on 2d, no damage. Crops continued to improve. Some fall seeding and corn cutting done. Some millet cut. Pastures better. Cider making in full blast. Corn ripening rapidly, some cut.

Week ending Sept. 16th—Warm with rainfall somewhat deficient. A generally favorable week, except in western half of state where rains were light. Late potatoes being dug. Tobacco and corn cutting and fall seeding made fair progress. Pasturage better. Storm on 12th blew down some corn and fruit from trees, and washed out prepared wheat ground in many places. In western counties pastures are still poor and water scarce.

Week ending Sept. 23d—Intensely warm in greater portion, a few light frosts early part, dry western and southern portions, but fair rainfall elsewhere. Wheat and rye seeding and corn and tobacco cutting made excellent progress. Hot sunshine ripened late corn very rapidly. Crops made some improvement in eastern half of state, at a standstill or retrograded where rain was insufficient. Some wheat and rye up. A little millet cut. Gardens fair. Clover threshing continued.

Week ending September 30th—Very warm fore part, cooler latter portion. Frosts 24th 28th, 30th, no serious damage. Showers 23d, 25th and 26th mostly light and scattered. Grass made but little, if any, progress. Rain badly needed in western counties. Wheat and rye seeding, clover seed threshing, potato digging, corn and tobacco cutting made rapid progress toward completion. Some corn husked and cribbed. Buckwheat cutting begun in northern and middle sections. Water scarce in some western counties. Apple picking general. Much cider and apple butter being made.

NORTHERN SECTION. The weather for the first and last part of the week was hot, while during the middle of the week the days were only moderately warm and the nights were cool, light frosts being reported from several counties on the morning of the 22d in low exposed localities, but the damage done was very slight. The rains during the week have been light and scattered, and have not been of much substantial benefit, and in many counties water is scarce, and the ground too dry and hard for fall plowing. Corn continues to look well in nearly all parts of the section, but in several counties on the uplands it has been affected by the dry weather. Early potatoes are ripe and many of them dug, and late potatoes are in a promising condition. Millet has made small growth. Fall plowing for wheat is well advanced, except when delayed by the ground being dry and hard. Pastures show an improved condition in many counties, but in several they are badly dried up, and stock water is scarce. Some grapes are ripe and on the market. Most of the fruits are fair to good.

Aug. 26

LORAIN. Rain on the 24th did much good. Corn is doing well. Grapes will, many of them, be ready to ship by next week. Ground in good shape for fall plowing. Oberlin, 70, trace.

NORTHERN SECTION. The weather has been very warm during the week, and abundant rains have fallen in all or nearly all of the counties. Corn is generally in fine condition, is earing well and is maturing rapidly, being nearly ready to cut in several counties. Late potatoes are generally in good condition, except that blight is reported as doing some damage, and one or two reports of damage by grubs. Millet and fodder corn have made much improvement. Root crops and gardens are looking better. Cider making has begun. Fall plowing is well advanced and in many counties nearly completed; ground is generally in good condition. Pastures are much improved, but in many the grass is still short. Buckwheat is filling well. Some fields of seed clover are filling well while others are reported as in poor condition. Sweet corn and tomatoes, raised for canning, are in good condition.

LORAIN. Corn is earing well. Grape picking will be going on next week. Fall plowing for wheat is well advanced. Late potatoes look well. Root crops and gardens are in good condition. Oberlin, 74, 1.07.

NORTHERN SECTION. Splendid rains have fallen in nearly all of the counties of this section. The days have been quite warm but the morning of the 2nd was quite cool, and a light frost was reported from several low exposed localities, but did no damage. The condition of all growing vegetation, not already past recovery, was greatly improved, and stock water is now plenty. Corn is maturing rapidly, is well eared, and cutting has begun in many places. Late potatoes continue to look well, but a few fields are in danger of injury by rotting on account of excessive moisture. Clover for seed is well filled, but is thin on the ground. Fodder corn and millet are doing well, also turnips and onions. Gardens are in a much improved condition. Pastures and meadows are greening up nicely, and stock is in better condition. The ground for fall seeding of wheat and rye has been nearly all plowed, and a few fields have been sown, but most farmers are waiting till a little later in the season. The ground is generally in fine condition for seeding but a few fields are a little too wet.

LORAIN. Plowing for wheat is largely done. Corn is doing well. Pastures and meadows show much improvement. The ground is well soaked by recent rain. Oberlin, 69, 0.66.

NORTHERN SECTION. The weather was excessively hot till the 12th or 13th, when it became much cooler. Heavy, and in some places excessive, rains fell throughout the eastern half of the section, but in the western half the showers were light and scattered. Some damage was done to crops in portions of the eastern half by high winds and the washing of the soil. The ground in the eastern half of the section is generally in good condition for the growing crops and for seeding, while in the western half many fields are too dry and farmers are waiting for more rain before seeding. Corn is generally well eared and is ripening rapidly, many have begun cutting. The greater part of the fall wheat and rye crop has been put in, and the early sown wheat is coming up nicely. Some potatoes have been dug; a few fields have been damaged by blight, and some others in eastern part are threatened with rotting. Tobacco, in the few counties in which it is raised, is being harvested. Clover for seed is being cut. Pastures and feed in the eastern part look well and the water is plenty, while in the western part many pastures are dry and brown and water is still scarce.

LORAIN. Quite warm, and splendid weather for maturing corn, and a little has been cut. Wheat is being sown. Clover for seed being cut, and is well filled. Grape harvest is in progress. Hail storm on 12th, but damage was slight. Oberlin, 74, 0.88.

NORTHERN SECTION. The early part of the week was cool, and light frosts were reported on the morning of the 15th from several low and exposed localities, but the damage done was very slight. The latter half of the week was excessively hot, and especially so for this season of the year. Showers in several places quite heavy, were general from 16th to 18th inclusive, but since that time no rain of any consequence has fallen. The sunshine for the week has been above the average for this time of year. Corn is ripening rapidly, is generally well eared, and much of the crop has already been cut; the fodder of many fields that has not been cut is drying badly. Wheat seeding where not completed is progressing rapidly, and the ground is generally in good condition; fields that were sown early are coming on nicely, with but few exceptions. Tobacco is nearly all cut. Potatoes are being dug, and some fields are rotting. Rye is being sown. Fodder corn and millet are doing well. Clover seed being threshed, seed of good quality. Fruit is being gathered, and is generally in good condition. Cider making in progress. Meadows and pastures in part of the counties look well, but in others the pastures are short and brown. Stock water is scarce in several of the western counties.

LORAIN. Corn cutting is progressing rapidly. Wheat seeding nearly completed. Grapes are being harvested. Oberlin, 68, 0.11.

NORTHERN SECTION. The weather immediately preceding and during the first of the week was excessively hot for the time of year, but beginning with the 23d was more seasonable, but the temperature has averaged slightly above the normal for most of days of the week. Light rains have fallen, mostly on the 25th and 26th. Light frosts were general on the 24th and 28th, and were also reported from several counties on the 23d, 25th and 26th; the frosts of the 24th and 28th were reported as heavy on low mucky ground in several places, but the damage was very slight in all sections. The week has been favorable for the maturing and harvesting of crops, but more rain is needed in most of the section, to give winter grain a good start, for meadows and pastures, and for wells and stock water. Corn is well eared, it is mostly cut and in shock, and is in fine condition throughout the section. Wheat seeding is about completed, and early sown is coming on nicely. Potato digging is progressing, and the crop is generally satisfactory and of good quality, but a few fields have been damaged to some extent by rotting, caused, probably by local heavy showers and hot weather. Apples being picked and stored, and cider made. Buckwheat has been mostly cut. Pastures and meadows show an improved condition, but many meadows are badly killed out and are being plowed for spring crops. Corn fodder corn has been cut, and other fields are still green.

a drouth is broken soon. Apples dropping.

NORTHERN SECTION. The drouth continues throughout the section, and no rain has fallen during the week except light scattered showers along the lake shore. The days have been warm and the nights cool. The week has been a favorable one for haying and harvesting. The wheat harvest is well advanced, with a light yield but quality generally good, except some fields that were quite badly rusted. Oats are turning some, with the prospect for a crop not materially changed. Corn has not as yet been materially affected by the dry weather and generally looks well, especially on black ground. Potatoes are showing the effects of the drouth and are not setting well. Haying is well advanced, and the crop is being cured in good condition, but the yield is very light. Pastures are badly dried up and stock water is scarce, many are feeding cattle. Grasshoppers are numerous and damaging vegetation in several counties. Apples are dropping badly, and small fruits are drying on the bushes. Gardens are in poor condition.

July 8

LORAIN. Weat being cut; short straw, but good berry. Corn and oats doing well. Potatoes blossoming and look well. Oats have retrograded. Gardens are doing fairly, but must have rain soon. Pastures dry. Water scarce. Hay crop very light.

Temperature 71 — 67
Precipitation .69 .04
Sunshine 55 73

NORTHERN SECTION. The drouth continues, and no rains of any consequence have fallen during the week. The days have been warm and the nights cool, and light frosts on the lowlands were reported from several counties, but no damage was done. Wheat is nearly all harvested, and threshing has begun, yield variable. Haying is nearly completed, and the crop has been secured in good condition but with a light yield. Oats are turning rapidly, and a few have been cut. The yield of clover seed is good in some counties, and nearly a failure in others. Corn is holding its own very well considering the dry weather, and on low black ground is looking well. Potatoes are showing the affects of the drouth and are not growing much, although the tops look promising. Gardens and pastures are badly dried up, and stock water is becoming scarce; many are feeding stock. Apples continue to fall badly, and much of the small fruit is drying up.

July 15

LORAIN. Wheat about all cut, will be about half a crop. Corn and potatoes looking well. Oats ripening, cutting will begin next week. Pastures almost gone. Timothy not more than one-third crop. Second growth clover very poor. Early apples ripening. Prospects for fruit fair.

Temperature 71 70
Precipitation .69 .09
Sunshine 55 73

NORTHERN SECTION. Good rains fell in the early part of the week, and in the eastern half of the section they were quite heavy. The days have been quite warm, unusually so during last three days of the period. The condition of all vegetation has improved, and in the eastern half the change for the better has been quite decided. The threshing of wheat has begun, the yield being generally light, and in several counties of poor quality. Oats are ripening, in some places the harvest has begun, the yield seems to be good in most counties. Corn is doing very well, but in some places is quite uneven. Potatoes show some improvement, but the ground is too dry for a good development of the tuber. Pastures are still badly dried up, and frequent rains will be necessary to put them in good condition. Stock water is scarce in many places, and in some localities stock feeding is still necessary. Gardens are looking better than one week ago. Large fruits continue to drop, especially apples, and small fruits have dried badly on the bushes.

July 22

LORAIN. Wheat harvested, threshing begun, yield better than expected. Haying about over, crop light. Oats turning rapidly, and promise a good yield. Corn is doing fairly well. Potatoes need rain. Pastures are very dry. Oberlin, 74, 0.28.

Temperature 71 73
Precipitation .59 .81
Sunshine [illegible] [illegible]

NORTHERN SECTION. Although no general rains have fallen over the section during the week, good local showers have fallen in nearly all counties, but in several the drouth continues. During a part of the week the nights have been quite cool, but in general the weather has been favorable for growing crops. Wheat is all harvested, and either threshed or housed, the yield is reported as poor to fair. Oats are being harvested, and although the straw is generally short, the heads are well filled and the yield in most counties will be good. Corn is growing nicely, many fields are in tassel, and in some the ears are forming. Potatoes show improvement over a week ago, and many fields are reported as in a promising condition, but the ground is too dry for the tubers in several counties. Pastures are still dry and short, but many are greening up a little. Stock feeding is necessary in many places. Much corn has been planted for fodder. Some timothy is being cut for seed. Apples continue to fall, but still promise a fairly good crop. Gardens are looking somewhat better than last week.

July 29

LORAIN. Oats being cut, good yield expected. Corn looking well. Potatoes badly in need of rain. Beans doing well. Nearly all are feeding stock as pastures are bare. Much corn planted for fodder. Oberlin, 74, 0.15

Temperature 73 72
Precipitation .65 .51
Sunshine [illegible] .63

NORTHERN SECTION. No rains have fallen during the week, except light and generally local showers. The days have been warm, but the nights were cool. The condition of all growing crops has somewhat improved during the week on account of good rains of the week previous. Oats are nearly all harvested, and the yield is reported as good, and in many counties as excellent. Corn has made good progress during the week and is looking well, except that many fields are uneven on account of replanting early in the season; it is generally in tassel and much is silking. Potatoes are looking some better, and are generally of good quality. Clover seed is a light crop. Pastures are still brown and bare, but look a little better. Fall plowing for wheat has begun, but some fields are too dry.

Aug. 5

LORAIN. Corn is doing fairly well, but is in need of rain and nights have been too cool. Oats about all cut, good crop promised. Potatoes improving. Pastures bare. Oberlin, 66, trace.

Temperature 72 66
Precipitation .82 .16
Sunshine 55 74

NORTHERN SECTION. Good rains fell during the week, greatly benefiting corn, pastures, meadows, late potatoes and gardens. Corn is in tassel and earing out well; on high ground and clay land the prospect is not good, but on low, black land it is reported as being up to the average or above. Oats about all harvested and much of it threshed, the yield is better than expected. Early potatoes are generally poor in quality and but few in hill; late promise a fair yield. Pastures short but beginning to turn green. Small clover poor, Mammoth generally from fair to good. Apple trees are generally heavily loaded with fruit, but in some sections the crop will not be up to the average. Pears are generally good, also grapes and plums in some localities. Farmers generally engaged in plowing for wheat.

Aug. 12

LORAIN. Corn on low and rich land looking well, on high ground small. Tobacco small and backward, but little planted. Old meadows badly damaged by drouth. Oats promise a fair crop. Pastures and meadows starting since the rains.

Temperature [illegible]
Precipitation .49 1.11
Sunshine 55 68

NORTHERN SECTION. The week has been warm and sunny, with good showers, occasionally heavy, on first two days, and the weather has been very favorable for all growing crops. A few fields of oats in shock were damaged by the heavy showers, but most of the crop has been secured in good condition, and where it has been threshed the yield is reported as very good and of excellent quality. Corn is making an excellent growth and is earing well; the crop promises to be a very good one. Early potatoes are generally large and of good quality, but are few in a hill; late potatoes are doing well. Pastures are generally short, but are greening up in most of the counties and show a decided improvement. Plowing for wheat is well under way, and the ground is in good condition. The second crop of clover in many fields promises to be better than the first crop. Millet is making rather small growth. Some counties report the fruit crop, especially apples, as very abundant, while other counties report enough for home use. Grapes are not plenty but are of good quality, and picking has begun. Buckwheat is filling well.

Aug. 19

LORAIN. Corn and grapes doing well. Plowing for wheat well under way. Oberlin, 75, 0.76.

Temperature 70 74
Precipitation .81 .90
Sunshine 55 56

NORTHERN SECTION. The week has been cold, with occasional rains, especially in fore part, with a light fall of snow on the 14th. Frosts were general on the 12th, 13th and 17th, and in some counties occurred nearly every morning. Wheat has made some improvement during the week and does not seem to be injured by the cold, frosty nights, except in some exposed localities. Meadows and pastures have made fairly good growth. Corn that was up on the 17th was nearly all frozen to the ground, and planting and replanting is being pushed rapidly forward to completion. Oats were somewhat injured by freezing in some counties, but have generally made a fair growth. Early potatoes that were up were all cut to the ground. All fruits seem to have suffered by the frost. Apples are the least affected, and small fruits in some counties do not appear to be badly damaged. The grape crop in some localities is almost entirely destroyed. Garden truck of all kinds suffered severely, and in many places was entirely destroyed.

May 20

LORAIN. Wheat not much injured. Potatoes, garden truck, early corn and small fruit badly frozen. Oats are not coming up. Cold week and heavy frost on 13th and 17th.

Temperature	57	46
Precipitation	1.03	.60
Sunshine	52	41

NORTHERN SECTION. The first part of the week was cold, with hard frosts on the 20th, 21st and 22d, and light frosts in some counties on the morning of the 23d. Very little rain has fallen, fair weather prevailing during most of the week. Good rains and warm weather is needed for all kinds of vegetation. Wheat shows a fair growth and does not appear to have been injured by the cold freezing weather, except on low, mucky ground, where it was damaged considerably. Oats have been damaged slightly in some counties, and they have not made much growth. Early planted corn was generally up, except in the northeast counties along the lake, and was cut to the ground by the frosts; replanting is general, but worms are at work in some counties. Clover looks fairly well, but is being injured in some places by worms. Meadows and pastures are generally short, and rains are badly needed for all grass lands. Barley is heading in some counties and, with rye, has been injured in many localities. Early potatoes were all cut to the ground, which will much delay their growth; bugs are reported as numerous in some places. All garden truck that was up has been injured or destroyed by the frosts. Fruits of all kinds have suffered by the cold freezing weather, and in many places the grape crop is reported as entirely destroyed. Apples seem to have suffered the least damage. Berries have been much injured and in some counties seriously damaged.

May 27

LORAIN. Wheat turning yellow. Pastures and meadows at a standstill. Cut worms doing much damage to corn along the lake shore; corn that was up cut down by frost. All fruit killed away from the lake. Wellington, 50, 0.15; Oberlin, 49, 0.00.

Temperature	52	52
Precipitation	1.00	.17
Sunshine	52	80

NORTHERN SECTION. The week has been very dry, with not enough rain in any county to help vegetation to any extent. Monday was quite cold, and the last three days of the week have been excessively hot, with more than average amount of sunshine. Wheat has not made a good growth and is heading with the straw quite short; is spotted and uneven in many places. Oats have made but little growth, and still show the effects of the late freezing. Rye is in poor condition and some fields are being plowed under, some others are being pastured. Corn, that was killed by the frost and cut worms, has nearly all been replanted. All corn is doing fairly well in nearly all counties; cut worms are still at work in some fields. Potatoes that were cut to the ground are coming up again; bugs are numerous. Clover looks fairly well. Meadows and pastures are short, and pastures look brown in many places. Fruits are recovering from the effects of the cold weather and promise better than was expected, especially apples and pears.

June 3

LORAIN. Wheat doing nicely and heading. Grass short; hay will be a short crop. Corn coming up nicely, but being injured by worms. Potatoes coming up. Clover damaged by frost and cut worms. Grapes killed away from the lake. Wellington, 65, 0.00; Oberlin, 67, 0.00.

Temperature	62	68
Precipitation	1.02	.07
Sunshine	54	74

NORTHERN SECTION. The unusually hot weather continued during the first two days of the week, followed by much colder on Wednesday and Thursday, rising temperature the latter part of the week. Showers were general on the 4th and 5th, and vegetation was much improved, but the ground is still dry and more rains are needed. Wheat is heading, but the straw and heads are generally short, and in many places a thin stand. Oats are short, but show some improvement during the week. Rye is heading, some is being cut for hay, and a few fields are being plowed under. Corn is doing well, but in many places has been badly damged by cut worms, necessitating replanting. Cultivation is being rapidly pushed, and some fields are large enough so that a second cultivation has been commenced. Potatoes have recovered from the effects of being killed to the ground, and are doing well. Clover is heading and some fields are nearly ready to cut. Meadows and pastures are short, and the grass crop will be light. Fruits are falling some on account of dry weather. A light frost was noted on the morning of the 7th in several places, but no damage was reported.

June 10

LORAIN. All farm crops much improved. Wheat heading on short straw. Oats also short, but looks well. Grass coming out well. Planting all done. Corn and potatoes are being cultivated. Potatoes looking very well. Wellington, 70, 1.31.

Temperature		6
Precipitation		.9
Sunshine		55

NORTHERN SECTION. [illegible] and Friday, but they were light in most places, and have been insufficient to improve the condition of vegetation to any considerable extent, but were of great value as the ground is very dry. Wheat is headed and seems to be filling fairly well, but the heads and straw are short, and the crop will be light. Oats do not show much improvement during the week, and are heading with very short straw. Corn shows a good growth considering the dryness of the ground, and looks well but many fields are small owing to its having been replanted. Potatoes in nearly all counties have made good growth, but in many places bugs are numerous. Meadows and pastures are very short, and the hay crop will be very light. Clover is being cut in many places; yield small. The strawberry crop is very light. The tree fruits are dropping badly, but enough yet remains to admit of a fair crop.

June 17

LORAIN. Wheat is very short and the heads are not well filled. Clover will be a very short crop. Meadows are short and turning brown. Potatoes are looking well. Corn is growing finely and is of good color. Oberlin, 68, 0.00; Wellington, 00, 0.37.

Temperature	[illegible]	78
Precipitation		.65 .25
Sunshine		56 84

NORTHERN SECTION.—The eastern half of the section was visited by quite heavy rains on the 19th, 20th and 21st, while in the western half the rainfall was generally light and afforded but temporary relief, as the ground was not moistened to a sufficient depth to reach the roots of most growing plants. Wheat is ripening rapidly and some fields seem to be filling well, but with short heads; several counties reported damage to wheat fields on account of rust, grasshoppers and flies. Oats show a slightly improved condition, but the straw and heads are short. Corn is showing a good growth, but some fields are very uneven on account of replanting. Potatoes are doing very well in some counties, while in other the crop is reported in poor condition on account of the drouth and the ravages of bugs. Rye is a very poor crop, and many fields are being cut for feed. The hay crop promises to be the lightest for several years; haying is begun in some places. Clover is being generally cured, and the crop is not much better than other grasses. Pastures, especially in the eastern part show improvement, but are still very short and brown, and in some places feeding of stock is necessary. Large fruits are still falling badly, and small fruits give promise of a light yield.

June 24

LORAIN. Wheat and oats making good progress and filling nicely. Corn making remarkable growth. Potatoes looking very well indeed. Hay being made, and a very short crop. Farmers planting drill corn for fodder. Fruit dropping. Oberlin, 70, 0.66.

Temperature	72	71
[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	71

NORTHERN SECTION. The dry weather still continues in many of the counties, while in others sufficient rain has fallen to greatly improve the general condition, and the rain has been pretty well distributed throughout the week. Wheat is turning and in many places the harvest has begun, the crop seems to be light but of fairly good quality. Oats show a little improvement, but the straw and heads are short. Corn shows a good growth, except on some clay and sandy soils, where it has been effected by the dry weather. Potatoes show a fair growth in many of the counties, while in others the ground is still too dry for good results; bugs have damaged some fields. Rye and barley are being cut; crop generally light. Having has begun, and most of the clover crop has been cured, the yield will be unusually light throughout the section. Pastures are in a poor condition, and the feeding of stock has been necessary in some counties, in others they are improving somewhat. Fruits, especially apples, continue to drop.

July 1

LORAIN. Wheat about ready to cut, very well filled, but straw short. Corn and potatoes making rapid growth. Pastures improving. Some hay made, but it is a very poor crop. Apples falling. Oberlin, 72, 0.43. Wheat ripening fast, will be cut

[illegible]	57	[illegible]

49.7

1895

April 9th,

NORTHERN SECTION. Rain is reported as badly needed throughout the section, and all spring work is later than usual. Wheat is in hardly fair condition, having been damaged over some counties by the continued cold weather; in some is brown or want of rain, but the roots are healthy, and with favorable weather will recover. Plowing is in progress; over some counties the frost is still in the ground, or it is too dry for it to progress. Oat seeding is advancing slowly. A few early potatoes have been planted. Fall clover has been injured to an extent by the heaving out of the roots by frost, or by the dry condition of the ground. Grass has made but very little start as yet. The maple syrup yield is of good quality but is very light. Fruit is mostly in good condition except peaches, which, with the exception of a few counties near the lake promise poorly, being mostly winter killed.

LORAIN. Wheat though brown is well rooted. Considerable oats put in last week. Some peach buds alive. Cherries appear all right. Pastures too closely fed last fall and are starting slowly. Ground generally in fine condition for spring work. Maple sugar a light yield. Berry canes stood the winter very well.

Temperature	45°	45°
Precipitation	.72	.26
Sunshine	47%	40%

April 16

NORTHERN SECTION. Rains have been general and in some counties the amount was sufficient to delay farm work. Wheat has improved materially, and is getting a good start. Fall clover is looking better in some counties, but in others it was so badly winter killed that the rain had no material effect upon it. Oats are nearly all sown, except in the northeast counties bordering along the lake, where all farm work has hardly commenced yet. Fruits are advancing very slowly on account of the continued cool weather, but appear to be in good condition, except peaches, which look poorly. Plowing is well under way, but has been delayed some by the heavy showers. Early potatoes are being planted, and gardens are being made. The sugar season has ended, and the crop was short but of good quality.

April 16

LORAIN. Much improvement in grass and wheat. Not much oats sown. Nights too cold. Heavy frost Wednesday night. Not much plowing done. Clover not improved. Oberlin, 52, 0.19.

Temperature	46	48
Precipitation	.63	1.14
Sunshine	50	47

May 23

NORTHERN SECTION. The weather has been generally clear and cool during the week, and frost has occurred nearly every night in some of the counties. Vegetation of all kinds has advanced very slowly and warm rains are generally needed. Wheat has remained nearly as it was a week ago, but has improved slowly in some counties; in others it looks spotted, and on some high ground it is thin. Clover, meadows and pastures have not made much growth as yet. Oats are nearly all sown, and in many counties are coming up nicely. Early potatoes are being planted in most of the counties, and, except along the lake in the Northeast counties, gardens are being made. Plowing for corn is progressing rapidly, as the ground is in excellent condition. Fruit buds are starting very slowly, and have not been injured by the cold frosty nights. The prospect for peaches in some counties is slightly improved.

April 23

LORAIN. Very little progress made this week, as rain is needed badly, and the nights too cool, having had four white frosts in succession. Oats nearly put in. Good prospect of apples and pears. Not many berry sets put in as usual.

	Normal	Actual for week
Temperature		
Precipitation		
Sunshine		

April 29

NORTHERN SECTION. Light showers occurred in early part of the week and also on last two days, but it was not sufficient, and warm rains are needed in nearly all counties. The weather was warm on Thursday and Friday, but aside from those two days the nights have been cool. Vegetation of all kinds has made some improvement. Wheat shows a somewhat improved condition, but its condition is not generally satisfactory, as in many places it is thin and yellow and in other fields it is spotted. Clover has made some improvement, but looks only fairly well. Oats are coming up and look well in nearly all counties. The ground is in good condition for plowing, and have corn has been planted in several counties. Early potatoes are nearly all planted, and gardens are being made. Pastures are starting very slowly, and not much stock is out as yet. Fruit trees are beginning to bloom and fruit prospects are good.

May 6

LORAIN. Wheat and grass not much improved. Oats nearly all sown. Plowing for corn is the order. Clover crop bids fair. Fruit trees bid fair for good yield. Wheat and grass looking better.

Temperature	51	56
Precipitation	.54	.26
Sunshine	51	82

NORTHERN SECTION. But very little rain was reported during the week, not enough to help vegetation. The weather was warm during early part of week, and has been unusually hot during last half. Vegetation of all kinds is badly in need of warm, steady showers. Wheat, meadows and pastures have made slow growth. Oats are mostly up and generally look fairly well. Plowing for corn has advanced rapidly, and planting is in progress. Worms are working on clover in several counties. Fruit trees of all kinds are coming rapidly in bloom, and nearly all fruits promise an excellent crop, except peaches, and these in several counties show improved conditions. Stock is being turned out, but the pastures are generally short.

May 6

LORAIN. Wheat, meadows and clover not doing well. Oats sown and coming up. Pastures are short. Fruits are beginning to bloom, and small fruits are doing poorly. Oberlin, 68, 0.00.

Temperature	54	64
Precipitation	.87	.01
Sunshine	51	87

NORTHERN SECTION. The week was unusually warm until Saturday, when it became much cooler. Heavy showers in most of the counties on first two days of the week, and occasional showers since that time have greatly improved the crop conditions, and vegetation of all kinds has made rapid progress, but in several counties the rain was light and more is needed owing to the previous dry conditions. Wheat shows an improved condition. Grasses and meadows are now growing rapidly, but are still somewhat backward. Clover is making much improvement, but is being badly eaten by worms in some counties. The greater part of the corn is planted and some is coming up, cut worms are at work. Early potatoes are up, some large enough to cultivate; bugs are at work in some counties. The fruit bloom was very heavy, and nearly all kinds promise a good crop. Worms are working on fruit trees and currants, and the trees are being sprayed to prevent injury. Stock is nearly all out on pasture.

May 13

LORAIN. Wheat, oats and grass looking much better. Corn planting about completed; potatoes all in; grass and pastures needing rain; oats and gardens doing nicely. Fruit prospects excellent. Oberlin, 73, 0.00.

Temperature	~~58~~	~~71~~
Precipitation	76	64
Sunshine	52	68

NORTHERN SECTION. The weather for the first and last part of the week was hot, while during the middle of the week the days were only moderately warm and the nights were cool, light frosts being reported from several counties on the morning of the 22d in low exposed localities, but the damage done was very slight. The rains during the week have been light and scattered, and have not been of much substantial benefit, and in many counties water is scarce, and the ground too dry and hard for fall plowing. Corn continues to look well in nearly all parts of the section, but in several counties on the uplands it has been affected by the dry weather. Early potatoes are ripe and many of them dug, and late potatoes are in a promising condition. Millet has made small growth. Fall plowing for wheat is well advanced, except when delayed by the ground being dry and hard. Pastures show an improved condition in many counties, but in several they are badly dried up, and stock water is scarce. Some grapes are ripe and on the market. Most of the fruits are fair to good.

LORAIN. Rain on the 24th did much good. Corn is doing well. Grapes will, many of them, be ready to ship by next week. Ground in good shape for fall plowing. Oberlin, 70, trace.

NORTHERN SECTION. The weather has been very warm during the week, and abundant rains have fallen in all or nearly all of the counties. Corn is generally in fine condition, is earing well and is maturing rapidly, being nearly ready to cut in several counties. Late potatoes are generally in good condition, except that blight is reported as doing some damage, and one or two reports of damage by grubs. Millet and fodder corn have made much improvement. Root crops and gardens are looking better. Cider making has begun. Fall plowing is well advanced and in many counties nearly completed; ground is generally in good condition. Pastures are much improved, but in many the grass is still short. Buckwheat is filling well. Some fields of seed clover are filling well, while others are reported as in poor condition. Sweet corn and tomatoes, raised for canning, are in good condition.

LORAIN. Corn is earing well. Grape picking will be going on next week. Fall plowing for wheat is well advanced. Late potatoes look well. Root crops and gardens are in good condition. Oberlin, 74, 1.07.

NORTHERN SECTION. Splendid rains have fallen in nearly all of the counties of this section. The days have been quite warm, but the morning of the 2nd was quite cool, and a light frost was reported from several low exposed localities, but did no damage. The condition of all growing vegetation, not already past recovery, was greatly improved, and stock water is now plenty. Corn is maturing rapidly, is well eared, and cutting has begun in many places. Late potatoes continue to look well, but a few fields are in danger of injury by rotting on account of excessive moisture. Clover for seed is well filled, but is thin on the ground. Fodder corn and millet are doing well, also turnips and onions. Gardens are in a much improved condition. Pastures and meadows are greening up nicely, and stock is in better condition. The ground for fall seeding of wheat and rye has been nearly all plowed, and a few fields have been sown, but most farmers are waiting till a little later in the season. The ground is generally in fine condition for seeding, but a few fields are a little too wet.

LORAIN. Plowing for wheat is largely done. Corn is doing well. Pastures and meadows show much improvement. The ground is well soaked by recent rain. Oberlin, 69, 0.66.

NORTHERN SECTION. The weather was excessively hot till the 12th or 13th, when it became much cooler. Heavy, and in some places excessive, rains fell throughout the eastern half of the section, but in the western half the showers were light and scattered. Some damage was done to crops in portions of the eastern half by high winds and the washing of the soil. The ground in the eastern half of the section is generally in good condition for the growing crops and for seeding, while in the western half many fields are too dry and farmers are waiting for more rain before seeding. Corn is generally well eared and is ripening rapidly, many have begun cutting. The greater part of the fall wheat and rye crop has been put in, and the early sown wheat is coming up nicely. Some potatoes have been dug; a few fields have been damaged by blight, and some others in eastern part are threatened with rotting. Tobacco, in the few counties in which it is raised, is being harvested. Clover for seed is being cut. Pastures and feed in the eastern part look well and the water is plenty, while in the western part many pastures are dry and brown and water is still scarce.

LORAIN. Quite warm, and splendid weather for maturing corn, and a little has been cut. Wheat is being sown. Clover for seed being cut, and is well filled. Grape harvest is in progress. Hail storm on 12th, but damage was slight. Oberlin, 74, 0.89.

NORTHERN SECTION. The early part of the week was cool, and light frosts were reported on the morning of the 15th from several low and exposed localities, but the damage done was very slight. The latter half of the week was excessively hot, and especially so for this season of the year. Showers in several places quite heavy, were general from 16th to 18th inclusive, but since that time no rain of any consequence has fallen. The sunshine for the week has been above the average for this time of year. Corn is ripening rapidly, is generally well eared, and much of the crop has already been cut; the fodder of many fields that has not been cut is drying badly. Wheat seeding where not completed is progressing rapidly, and the ground is generally in good condition; fields that were sown early are coming on nicely, with but few exceptions. Tobacco is nearly all cut. Potatoes are being dug, and some fields are rotting. Rye is being sown. Fodder corn and millet are doing well. Clover seed being threshed, seed of good quality. Fruit is being gathered, and is generally in good condition. Cider making in progress. Meadows and pastures in part of the counties look well, but in others the pastures are short and brown. Stock water is scarce in several of the western counties.

LORAIN. Corn cutting is progressing rapidly. Wheat seeding nearly completed. Grapes are being harvested. Oberlin, 68, 0.11.

NORTHERN SECTION. The weather immediately preceding and during the first of the week was excessively hot for the time of year, but beginning with the 23d was more seasonable, but the temperature has averaged slightly above the normal for most of days of the week. Light rains have fallen, mostly on the 25th and 26th. Light frosts were general on the 24th and 28th, and were also reported from several counties on the 23d, 25th and 26th; the frosts of the 24th and 28th were reported as heavy on low mucky ground in several places, but the damage was very slight in all sections. The week has been favorable for the maturing and harvesting of crops, but more rain is needed in most of the section, to give winter grain a good start, for meadows and pastures, and for wells and stock water. Corn is well eared, it is mostly cut and in shock, and is in fine condition throughout the section. Wheat seeding is about completed, and early sown is coming on nicely. Potato digging is progressing, and the crop is generally satisfactory and of good quality, but a few fields have been damaged to some extent by rotting, caused, probably by local heavy showers and hot weather. Apples being picked and stored, and cider made. Buckwheat has been mostly cut. Pastures and meadows show an improved condition, but many meadows are badly killed out and are being plowed for spring crops. [illegible] fodder corn has been cut and other fields are still green.

if drouth is broken soon. Apples dropping.

NORTHERN SECTION. The drouth continues throughout the section, and no rain has fallen during the week except light scattered showers along the lake shore. The days have been warm and the nights cool. The week has been a favorable one for haying and harvesting. The wheat harvest is well advanced, with a light yield but quality generally good, except some fields that were quite badly rusted. Oats are turning some, with the prospect for a crop not materially changed. Corn has not as yet been materially affected by the dry weather and generally looks well, especially on black ground. Potatoes are showing the effects of the drouth and are not setting well. Haying is well advanced, and the crop is being cured in good condition, but the yield is very light. Pastures are badly dried up and stock water is scarce, many are feeding cattle. Grasshoppers are numerous and damaging vegetation in ...ral counties. Apples are dropping badly, and small fruits are drying on the bushes. Gardens are in poor condition.

July 8

LORAIN. Weat being cut; short straw, but good berry. Corn and oats doing well. Potatoes blossoming and look well. Oats have retrograded. Gardens are doing fairly, but must have rain soon. Pastures dry. Water scarce. Hay crop very light.

Temperature 71 — 67
Precipitation .69 .04
Sunshine 55 73

...and oats. ...Poor prospect for fall feeding, and burned ...ying up, otherwise in fair condition and fair.

NORTHERN SECTION. The drouth continues, and no rains of any consequence have fallen during the week. The days have been warm and the nights cool, and light frosts on the lowlands were reported from several counties, but no damage was done. Wheat is nearly all harvested, and threshing has begun, yield variable. Haying is nearly completed, and the crop has been secured in good condition but with a light yield. Oats are turning rapidly, and a few have been cut. The yield of clover seed is good in some counties, and nearly a failure in others. Corn is holding its own very well considering the dry weather, and on low black ground is looking well. Potatoes are showing the affects of the drouth and are not growing much, although the tops look promising. Gardens and pastures are badly dried up, and stock water is becoming scarce; many are feeding stock. Apples continue to fall badly, and much of the small fruit is drying up.

July 15

LORAIN. Wheat about all cut, will be about half a crop. Corn and potatoes looking well. Oats ripening, cutting will begin next week. Pastures almost gone. Timothy not more than one-third crop. Second growth clover very poor. Early apples ripening. Prospects for fruit fair.

Temperature 71 70
Precipitation .69 .09
Sunshine 55 73

...local in character; even where improvement occurred.

NORTHERN SECTION. Good rains fell in the early part of the week, and in the eastern half of the section they were quite heavy. The days have been quite warm, unusually so during last three days of the period. The condition of all vegetation has improved, and in the eastern half the change for the better has been quite decided. The threshing of wheat has begun, the yield being generally light, and in several counties of poor quality. Oats are ripening, in some places the harvest has begun, the yield seems to be good in most counties. Corn is doing very well, but in some places is quite uneven. Potatoes show some improvement, but the ground is too dry for a good development of the tuber. Pastures are still badly dried up, and frequent rains will be necessary to put them in good condition. Stock water is scarce in many places, and in some localities stock feeding is still necessary. Gardens are looking better than one week ago. Large fruits continue to drop, especially apples, and small fruits have dried badly on the bushes.

July 22

LORAIN. Wheat harvested, threshing begun, yield better than expected. Haying about over, crop light. Oats turning rapidly, and promise a good yield. Corn is doing fairly well. Potatoes need rain. Pastures are very dry. Oberlin, 74, 0.28.

Temperature 71 73
Precipitation .59 .81
Sunshine [illegible] 77

...promising. Apples and ...Some wheat threshed ...ripening. Grapes ...

NORTHERN SECTION. Although no general rains have fallen over the section during the week, good local showers have fallen in nearly all counties, but in several the drouth continues. During a part of the week the nights have been quite cool, but in general the weather has been favorable for growing crops. Wheat is all harvested, and either threshed or housed, the yield is reported as poor to fair. Oats are being harvested, and although the straw is generally short, the heads are well filled and the yield in most counties will be good. Corn is growing nicely, many fields are in tassel, and in some the ears are forming. Potatoes show improvement over a week ago, and many fields are reported as in a promising condition, but the ground is too dry for the tubers in several counties. Pastures are still dry and short, but many are greening up a little. Stock feeding is necessary in many places. Much corn has been planted for fodder. Some timothy is being cut for seed. Apples continue to fall, but still promise a fairly good crop. Gardens are looking somewhat better than last week.

July 29

LORAIN. Oats being cut, good yield expected. Corn looking well. Potatoes badly in need of rain. Beans doing well. Nearly all are feeding stock as pastures are bare. Much corn planted for fodder. Oberlin, 74, 0.15

Temperature 73 72
Precipitation .65 .51
Sunshine [illegible] .63

...peaches and prunes are ...ing. Late potatoes all cut ...crop. Still ...

NORTHERN SECTION. No rains have fallen during the week, except light and generally local showers. The days have been warm, but the nights were cool. The condition of all growing crops has somewhat improved during the week on account of good rains of the week previous. Oats are nearly all harvested, and the yield is reported as good, and in many counties as excellent. Corn has made good progress during the week and is looking well, except that many fields are uneven on account of replanting early in the season; it is generally in tassel and much is silking. Potatoes are looking some better, and are generally of good quality. Clover seed is a light crop. Pastures are still brown and bare, but look a little better. Fall plowing for wheat has begun, but some fields are too dry.

Aug. 5

LORAIN. Corn is doing fairly well, but is in need of rain and nights have been too cool. Oats about all cut, good crop promised. Potatoes improving. Pastures bare. Oberlin, 66, trace.

Temperature 72 66
Precipitation .82 .16
Sunshine 55 74

...still plentiful in many localities. ...and promise ...

NORTHERN SECTION. Good rains fell during the week, greatly benefiting corn, pastures, meadows, late potatoes and gardens. Corn is in tassel and earing out well; on high ground and clay land the prospect is not good, but on low, black land it is reported as being up to the average or above. Oats about all harvested and much of it threshed, the yield is better than expected. Early potatoes are generally poor in quality and but few in hill; late promise a fair yield. Pastures short but beginning to turn green. Small clover poor, Mammoth generally from fair to good. Apple trees are generally heavily loaded with fruit, but in some sections the crop will not be up to the average. Pears are generally good, also grapes and plums in some localities. Farmers generally engaged in plowing for wheat.

Aug. 12

LORAIN. Corn on low and rich land looking well, on high ground small. Tobacco small and backward, but little planted. Old meadows badly damaged by drouth. Oats promise a fair crop. Pastures and meadows starting since the rains.

Temperature [illegible]
Precipitation .49 1.11
Sunshine 55 68

...springs, wells and streams rather low in many localities. MEDINA. Corn looking well on low ...

NORTHERN SECTION. The week has been warm and sunny, with good showers, occasionally heavy, on first two days, and the weather has been very favorable for all growing crops. A few fields of oats in shock were damaged by the heavy showers, but most of the crop has been secured in good condition, and where it has been threshed the yield is reported as very good and of excellent quality. Corn is making an excellent growth and is earing well; the crop promises to be a very good one. Early potatoes are generally large and of good quality, but are few in a hill; late potatoes are doing well. Pastures are generally short, but are greening up in most of the counties and show a decided improvement. Plowing for wheat is well under way, and the ground is in good condition. The second crop of clover in many fields promises to be better than the first crop. Millet is making rather small growth. Some counties report the fruit crop, especially apples, as very abundant, while other counties report enough for home use. Grapes are not plenty but are of good quality, and picking has begun. Buckwheat is filling well.

Aug. 19

LORAIN. Corn and grapes doing well. Plowing for wheat well under way. Oberlin, 75, 0.76.

Temperature 70 71
Precipitation .81 .90
Sunshine 55 .66

...Corn doing finely. Tobacco ...

NORTHERN SECTION. The week has been cold, with occasional rains, especially in fore part, with a light fall of snow on the 14th. Frosts were general on the 12th, 13th and 17th, and in some counties occurred nearly every morning. Wheat has made some improvement during the week and does not seem to be injured by the cold, frosty nights, except in some exposed localities. Meadows and pastures have made fairly good growth. Corn that was up on the 17th was nearly all frozen to the ground, and planting and replanting is being pushed rapidly forward to completion. Oats were somewhat injured by freezing in some counties, but have generally made a fair growth. Early potatoes that were up were all cut to the ground. All fruits seem to have suffered by the frost. Apples are the least affected, and small fruits in some counties do not appear to be badly damaged. The grape crop in some localities is almost entirely destroyed. Garden truck of all kinds suffered severely, and in many places was entirely destroyed.

May 20

LORAIN. Wheat not much injured. Potatoes, garden truck, early corn and small fruit badly frozen. Oats are not coming up. Cold week and heavy frost on 13th and 17th.

Temperature 57 46
Precipitation 1.03 .60
Sunshine 52 41

NORTHERN SECTION. The first part of the week was cold, with hard frosts on the 20th, 21st and 22d, and light frosts in some counties on the morning of the 23d. Very little rain has fallen, fair weather prevailing during most of the week. Good rains and warm weather is needed for all kinds of vegetation. Wheat shows a fair growth and does not appear to have been injured by the cold freezing weather, except on low, mucky ground, where it was damaged considerably. Oats have been damaged slightly in some counties, and they have not made much growth. Early planted corn was generally up, except in the northeast counties along the lake, and was cut to the ground by the frosts; replanting is general, but worms are at work in some counties. Clover looks fairly well, but is being injured in some places by worms. Meadows and pastures are generally short, and rains are badly needed for all grass lands. Barley is heading in some counties and, with rye, has been injured in many localities. Early potatoes were all cut to the ground, which will much delay their growth; bugs are reported as numerous in some places. All garden truck that was up has been injured or destroyed by the frosts. Fruits of all kinds have suffered by the cold freezing weather, and in many places the grape crop is reported as entirely destroyed. Apples seem to have suffered the least damage. Berries have been much injured and in some counties seriously damaged.

May 27

LORAIN. Wheat turning yellow. Pastures and meadows at a standstill. Cut worms doing much damage to corn along the lake shore; corn that was up cut down by frost. All fruit killed away from the lake. Wellington, 50, 0.15; Oberlin, 49, 0.00.

Temperature 58 52
Precipitation 1.10 .07
Sunshine

NORTHERN SECTION. The week has been very dry, with not enough rain in any county to help vegetation to any extent. Monday was quite cold, and the last three days of the week have been excessively hot, with more than average amount of sunshine. Wheat has not made a good growth and is heading with the straw quite short; is spotted and uneven in many places. Oats have made but little growth, and still show the effects of the late freezing. Rye is in poor condition and some fields are being plowed under, some others are being pastured. Corn, that was killed by the frost and cut worms, has nearly all been replanted. All corn is doing fairly well in nearly all counties; cut worms are still at work in some fields. Potatoes that were cut to the ground are coming up again; bugs are numerous. Clover looks fairly well. Meadows and pastures are short, and pastures look brown in many places. Fruits are recovering from the effects of the cold weather and promise better than was expected, especially apples and pears.

June 3

LORAIN. Wheat doing nicely and heading. Grass short; hay will be a short crop. Corn coming up nicely, but being injured by worms. Potatoes coming up. Clover damaged by frost and cut worms. Grapes killed away from the lake. Wellington, 65, 0.00; Oberlin, 67, 0.00.

Temperature 62 68
Precipitation 1.02 .07
Sunshine 54

NORTHERN SECTION. The unusually hot weather continued during the first two days of the week, followed by much colder on Wednesday and Thursday, rising temperature the latter part of the week. Showers were general on the 4th and 5th, and vegetation was much improved, but the ground is still dry and more rains are needed. Wheat is heading, but the straw and heads are generally short, and in many places a thin stand. Oats are short, but show some improvement during the week. Rye is heading, some is being cut for hay, and a few fields are being plowed under. Corn is doing well, but in many places has been badly damged by cut worms, necessitating replanting. Cultivation is being rapidly pushed, and some fields are large enough so that a second cultivation has been commenced. Potatoes have recovered from the effects of being killed to the ground, and are doing well. Clover is heading and some fields are nearly ready to cut. Meadows and pastures are short, and the grass crop will be light. Fruits are falling some on account of dry weather. A light frost was noted on the morning of the 7th in several places, but no damage was reported.

June 10

LORAIN. All farm crops much improved. Wheat heading on short straw. Oats also short, but looks well. Grass coming out well. Planting all done. Corn and potatoes are being cultivated. Potatoes looking very well. Wellington, 70, 1.31.

NORTHERN SECTION. [illegible] and Friday, but they were light in most places, and have been insufficient to improve the condition of vegetation to any considerable extent, but were of great value as the ground is very dry. Wheat is headed and seems to be filling fairly well, but the heads and straw are short, and the crop will be light. Oats do not show much improvement during the week, and are heading with very short straw. Corn shows a good growth considering the dryness of the ground, and looks well but many fields are small owing to its having been replanted. Potatoes in nearly all counties have made good growth, but in many places bugs are numerous. Meadows and pastures are very short, and the hay crop will be very light. Clover is being cut in many places; yield small. The strawberry crop is very light. The tree fruits are dropping badly, but enough yet remains to admit of a fair crop.

June 17

LORAIN. Wheat is very short and the heads are not well filled. Clover will be a very short crop. Meadows are short and turning brown. Potatoes are looking well. Corn is growing finely and is of good color. Oberlin, 68, 0.00; Wellington, 00, 0.37.

Temperature 73°
Precipitation .65 .25
Sunshine 56 .84

NORTHERN SECTION.—The eastern half of the section was visited by quite heavy rains on the 19th, 20th and 21st, while in the western half the rainfall was generally light and afforded but temporary relief, as the ground was not moistened to a sufficient depth to reach the roots of most growing plants. Wheat is ripening rapidly and some fields seem to be filling well, but with short heads; several counties reported damage to wheat fields on account of rust, grasshoppers and flies. Oats show a slightly improved condition, but the straw and heads are short. Corn is showing a good growth, but some fields are very uneven on account of replanting. Potatoes are doing very well in some counties, while in other the crop is reported in poor condition on account of the drouth and the ravages of bugs. Rye is a very poor crop, and many fields are being cut for feed. The hay crop promises to be the lightest for several years; haying is begun in some places. Clover is being generally cured, and the crop is not much better than other grasses. Pastures, especially in the eastern part show improvement, but are still very short and brown, and in some places feeding of stock is necessary. Large fruits are still falling badly, and small fruits give promise of a light yield.

June 24

LORAIN. Wheat and oats making good progress and filling nicely. Corn making remarkable growth. Potatoes looking very well indeed. Hay being made, and a very short crop. Farmers planting drill corn for fodder. Fruit dropping. Oberlin, 70, 0.66.

Temperature 72 71
Precipitation 1.14
Sunshine 71

NORTHERN SECTION. The dry weather still continues in many of the counties, while in others sufficient rain has fallen to greatly improve the general condition, and the rain has been pretty well distributed throughout the week. Wheat is turning and in many places the harvest has begun, the crop seems to be light but of fairly good quality. Oats show a little improvement, but the straw and heads are short. Corn shows a good growth, except on some clay and sandy soils, where it has been effected by the dry weather. Potatoes show a fair growth in many of the counties, while in others the ground is still too dry for good results; bugs have damaged some fields. Rye and barley are being cut; crop generally light. Haying has begun, and most of the clover crop has been cured, the yield will be unusually light throughout the section. Pastures are in a poor condition, and the feeding of stock has been necessary in some counties, in others they are improving somewhat. Fruits, especially apples, continue to drop.

July 1

LORAIN. Wheat about ready to cut, very well filled, but straw short. Corn and potatoes making rapid growth. Pastures improving. Some hay made, but it is a very poor crop. Apples falling. Oberlin, 72, 0.43.

Temperature 70 73
Precipitation .77 .58

1895

April 9th,

NORTHERN SECTION. Rain is reported as badly needed throughout the section, and all spring work is later than usual. Wheat is in hardly fair condition, having been damaged over some counties by the continued cold weather; in some is brown or want of rain, but the roots are healthy, and with favorable weather will recover. Plowing is in progress; over some counties the frost is still in the ground, or it is too dry for it to progress. Oat seeding is advancing slowly. A few early potatoes have been planted. Fall clover has been injured to an extent by the heaving out of the roots by frost, or by the dry condition of the ground. Grass has made but very little start as yet. The maple syrup yield is of good quality but is very light. Fruit is mostly in good condition except peaches, which, with the exception of a few counties near the lake promise poorly, being mostly winter killed.

LORAIN. Wheat though brown is well rooted. Considerable oats put in last week. Some peach buds alive. Cherries appear all right. Pastures too closely fed last fall and are starting slowly. Ground generally in fine condition for spring work. Maple sugar a light yield. Berry canes stood the winter very well.

Temperature	42°	42°
Precipitation	.73	.26
Sunshine	47	45

April 16

NORTHERN SECTION. Rains have been general and in some counties the amount was sufficient to delay farm work. Wheat has improved materially, and is getting a good start. Fall clover is looking better in some counties, but in others it was so badly winter killed that the rain had no material effect upon it. Oats are nearly all sown, except in the northeast counties bordering along the lake, where all farm work has hardly commenced yet. Fruits are advancing very slowly on account of the continued cool weather, but appear to be in good condition, except peaches, which look poorly. Plowing is well under way, but has been delayed some by the heavy showers. Early potatoes are being planted, and gardens are being made. The sugar season has ended, and the crop was short but of good quality.

April 16

LORAIN. Much improvement in grass and wheat. Not much oats sown. Nights too cold. Heavy frost Wednesday night. Not much plowing done. Clover not improved. Oberlin, 52, 0.19.

Temperature	46	48
Precipitation	.63	1.14
Sunshine	50	47

Apr 23

NORTHERN SECTION. The weather has been generally clear and cool during the week, and frost has occurred nearly every night in some of the counties. Vegetation of all kinds has advanced very slowly and warm rains are generally needed. Wheat has retained nearly as it was a week ago, but has improved slowly in some counties; in others it looks spotted, and on some high ground it is thin. Clover, meadows and pastures have not made much growth as yet. Oats are nearly all sown, and in many counties are coming up nicely. Early potatoes are being planted in most of the counties, and, except along the lake in the Northeast counties, gardens are being made. Plowing for corn is progressing rapidly, as the ground is in excellent condition. Fruit buds are starting very slowly, and have not been injured by the cold frosty nights. The prospect for peaches in some counties is slightly improved.

April 23

LORAIN. Very little progress made this week, as rain is needed badly, and the nights too cool, having had four white frosts in succession. Oats nearly put in. Good prospect of apples and pears. Not many berry sets out in as usual.

	Normal	Actual for week
Temperature		
Precipitation		
Sunshine		

NORTHERN SECTION. Light showers occurred in early part of the week and also on last two days, but it was not sufficient, and warm rains are needed in nearly all counties. The weather was warm on Thursday and Friday, but aside from those two days the nights have been cool. Vegetation of all kinds has made some improvement. Wheat shows a somewhat improved condition, but its condition is not generally satisfactory, as in many places it is thin and yellow and in other fields it is spotted. Clover has made some improvement, but looks only fairly well. Oats are coming up and look well in nearly all counties. The ground is in good condition for plowing, and have the corn has been planted in several counties. Early potatoes are nearly all planted, and gardens are being made. Pastures are starting very slowly, and not much stock is out as yet. Fruit trees are beginning to bloom and fruit prospects are good.

April 29

LORAIN. Wheat and grass not much improved. Oats nearly all sown. Plowing for corn is the order. Clover crop bids fair. Fruit trees bid fair for good yield.

May 6 — Wheat and grass looking better.

Temperature	51	56
Precipitation	.54	.28
Sunshine	51	82

NORTHERN SECTION. But very little rain was reported during the week, not enough to help vegetation. The weather was warm during early part of week, and has been unusually hot during last half. Vegetation of all kinds is badly in need of warm, steady showers. Wheat, meadows and pastures have made slow growth. Oats are mostly up and generally look fairly well. Plowing for corn has advanced rapidly, and planting is in progress. Worms are working on clover in several counties. Fruit trees of all kinds are coming rapidly in bloom, and nearly all fruits promise an excellent crop, except peaches, and these in several counties show improved conditions. Stock is coming turned out, but the pastures are generally short.

May 6

LORAIN. Wheat, meadows and clover not doing well. Oats sown and coming up. Pastures are short. Fruits are beginning to bloom, and small fruits are doing poorly. Oberlin, 68, 0.00.

Temperature	54	64
Precipitation	.57	.01
Sunshine	51	87

NORTHERN SECTION. The week was unusually warm until Saturday, when it became much cooler. Heavy showers in most of the counties on first two days of the week, and occasional showers since that time have greatly improved the crop conditions, and vegetation of all kinds has made rapid progress, but in several counties the rain was light and more is needed owing to the previous dry conditions. Wheat shows an improved condition. Grasses and meadows are now growing rapidly, but are still somewhat backward. Clover is making much improvement, but is being badly eaten by worms in some counties. The greater part of the corn is planted and some is coming up, cut worms are at work. Early potatoes are up, some large enough to cultivate; bugs are at work in some counties. The fruit bloom was very heavy, and nearly all kinds promise a good crop. Worms are working on fruit trees and currants, and the trees are being sprayed to prevent injury. Stock is nearly all out on pasture.

May 13

LORAIN. Wheat, oats and grass looking much better. Corn planting about completed; potatoes all in; grass and pastures needing rain; oats and gardens doing nicely. Fruit prospects excellent. Oberlin, 73, 0.00.
